Daily report and statistics about coronavirus and COVID-19

Published 12.03.2020 Updated 29.10.2020

Here is a selection of key data and statistics about SARS-CoV-2 and COVID-19 disease in Norway. The figures are updated at approximately 1 p.m.

26.10.2020: We are experiencing instability in the presentation of the diagrams on this page. We are working to fix the error. In the meantime try refreshing the page by pressing "F5".

The Norwegian Institute of Public Health has made changes in data presentation for test activity in Norway. This will lead to a higher number of people being shown as tested than previously shown. The changes were implemented on this key figures page on 19.10.2020.

Key figures for Norway

Total number in Norway since February 2020 (cumulative figures):

1 646 752 TESTED 29/10/2020	19 066 REPORTED CASES 29/10/2020
1228 ADMITTED TO HOSPITAL 29/10/2020	258 ADMITTED TO ICU 29/10/2020
281 DEATHS 29/10/2020	

Number tested

The laboratory results are collected in the MSIS Laboratory Database. Each laboratory in Norway submits data electronically directly to the database. The figure below illustrates the number of persons tested and the proportion of positive test results among these daily since the start of the epidemic. A new test on a person is defined as a test performed at least 7 days after the previous test on the same person. If the person is tested again after 7 days, they are counted as a new person. Figures from the last few days may be adjusted with the next update.

Updated October 29

Reported cases

The figure below shows the number of cases reported daily in Norway since the start of the epidemic. The cases are displayed by the specimen collection date. There are 1-2 days delay between diagnosis and registration in the Norwegian Surveillance System for Communicable Diseases (MSIS). The number of cases is updated retroactively when new notifications arrive.

Updated October 29

Date	Cumulative number of cases	New cases
21.02.2020	0	0
22.02.2020	0	0
23.02.2020	0	0

By sex and age

The figure below shows the total number of confirmed cases in Norway since the epidemic began, by age and sex.

Number of confirmed COVID-19 cases by age and sex

Double click on the map where you want to zoom in or scroll with your mouse to zoom in and out.

The figure is updated with the number reported by midnight on the previous day. Cases in MSIS are registered geographically and are based on the address in the population register. Therefore, there may be more cases reported in a municipality in MSIS than the municipality is aware of. MSIS also receives notifications that are not sent to the Municipal Medical Officer.

If you cannot find a municipality in the list, it means that MSIS has not yet received any notifications about people registered in that municipality.

Hospital admissions

The figure below illustrates the number of new patients admitted to hospital with COVID-19 as the main reason for admission.

Intensive care admissions

The figure below illustrates the number of patients with laboratory-confirmed COVID-19 admitted to intensive care.

Updated October 29

COVID-19-associated deaths, by age and sex

The figure below illustrates the number of COVID-19 associated deaths notified to the Norwegian Institute of Public Health, divided by sex and age group.

Weekly reports and older daily reports

Daily and weekly reports (in Norwegian)

The last daily report in pdf-format was published on Friday 19th June 2020. Most of the diagrams in the report are shown in the diagrams and tables above. These are updated on weekdays at approximately 1 p.m.

- COVID-19 weekly reports
- Older daily reports

Other COVID-19 statistics

Reproduction number - R

The reproduction number R will be presented weekly in the weekly report (English summary).

Inpatients in hospital

- COVID-19 - number of patients admitted to hospital (Directorate of Health)

Total mortality

The NIPH also calculates the total mortality in Norway through the NorMOMO-system. The status for total mortality is mentioned in the weekly reports.

- Latest diagram for European countries in EuroMOMO

HISTORY

23.10.2020: Temporarily removed table display in timeline graphs because of an error. The supporting data can still be downloaded in CSV and Excel via the menu.

19.10.2020 Changes in way test activity is presented - we present the number of tests performed as well as the number of people tested.

24.09.2020: Error in update for 24.9: In the update dated 24.9, it is reported that there were three new deaths during the last three weeks. An error means that one death was reported for a person under 40 years of age. This should be two deaths for people aged over 90 years and one death for a person aged between 80-89 years. NIPH is working to correct the error.

26.05.2020: Many of the figures are now available with data that can be downloaded.
