Today's covid-19 statements - download the files here

All weekdays at 14 we publish files with today's latest covid-19 statements.

Obs.

Due to Easter, we will not publish the download files with covid-19 inventories and monitoring data from Thursday, April 14th through Monday, April 18th.

7 April 2022 On 7 April 2022,

the Statens Serum Institut launched a new infection and vaccine dashboard. The dashboard shows how large a proportion of the population has: been infected since 17 December 2021, has received a 3rd vaccine injection, has been infected and has also received a 3rd vaccine injection, and has been infected and / or received a 3rd injection.

See [SSI's infection and vaccine dashboard](#)

Covid-19 dashboards

The covid-19 inventory files contain data from the [breakthrough infection dashboard and the infection pressure dashboard](#). Here you will find, among other things, statements about:

- key figures in total and the change since yesterday
- incidence in the last 7 days
- tested the last 7 days
- positive percentage in the last 7 days
- data distributed by regions, municipalities and test centers
- confirmed cases and admissions by vaccine status
- overview of infected and vaccinated from 17 December 2021 (published 7 April and onwards every Monday)
- etc.
