

Coronavirus Disease 2019 (COVID-19)

Daily Situation Report by the Robert Koch Institute

01/03/2022- CURRENT STATUS FOR GERMANY

Confirmed cases		7-day incidence (7-di)		DIVI-Intensive care registry as of 28/02/2022 12:15 AM	Vaccination monitoring as of 01/03/2022
Total ¹	active cases ²	Total population	No. of districts with 7-di > 50/100,000 pop.	Change to previous day for no. of cases currently in ICU	No. of vaccinations reported in last 24h
+122,111 (14,867,218)	-107,000 [ca. 3,504,700]	1,213.0 cases/100,000 pop.	±0 [411/411]	-12 [2,245]	1st vaccination: +7,415 2nd vaccination: +16,927 Booster vaccination: +48,728
Hospitalised ¹	Recovered ³	Hospitalised (all age groups)	No. of districts with 7-di > 500/100,000 pop.	% of COVID-19 occupancy in total number of operable beds ⁴	Total no. of people fully vaccinated against COVID-19 ^{5, 6, 7}
+1,622 (445,406)	+228,800 (ca. 11,239,600)	5.93 cases/100,000 pop.	+1 [410/411]	10.2 %	N1: 63,452,470 N2: 62,717,992 N3: 47,367,046
Deaths ¹		Hospitalised aged 60 years +	No. of districts with 7-di > 1000/100,000 pop	No. of new cases in ICU compared to the previous day	Share of population fully vaccinated against COVID-19
+235 (122,937)		12.40 cases/100,000 pop.	-16 [285/411]	+165	N1: 76.3 % ⁵ N2: 75.4 % ⁶ N3: 57.0 % ⁷

Numbers in () brackets show cumulative values, numbers in [] brackets show current values. Footnotes can be found in the Annex.

COVID-19 cases are notified to the local public health authorities in the respective districts, in accordance with the German Protection against Infection Act (IfSG). The data are further transmitted through the respective federal state health authority to the Robert Koch Institute (RKI). This situation report presents the uniformly recorded nationwide data on laboratory-confirmed COVID-19 cases transmitted to RKI.

– Changes since the last report are marked **blue** in the text –

Summary (as of 01/03/2022, 10:00 AM)

- Yesterday, **122,111** new laboratory-confirmed COVID-19 cases as well as **235** new deaths associated with COVID-19 were transmitted to the RKI in Germany. The national 7-day incidence is **1,213.0** cases per 100,000 population. The 7-day incidence in federal states lies between **1,816** cases per 100,000 population in **Saxony-Anhalt** and **548.2** per 100,000 population in **Hamburg**.
- Overall, **+1,622** new hospitalisations with COVID-19 were reported, the 7-day incidence of hospitalised cases is **5.93** per 100,000 population.
- On **28/02/2022** (12:15 AM), **2,245** COVID-19 patients were in intensive care units (ICU), **-12** cases compared to the day before. The COVID-19 adult occupancy as a percentage of all operational adult intensive care beds is **10.2 %**.⁴
- Since 26/12/2020, **169,931,183** vaccine doses have been administered in Germany. Overall, **76.3 %** of the population in Germany have been vaccinated at least once.⁵ **75.4 %** have received a complete course of vaccination against COVID-19.⁶ **57.0 %** have received a booster vaccination.⁷

Epidemiological Situation in Germany (as of 01/03/2022, 0:00 AM)

Since January 2020, a total of **14,867,218 (+122,111)** laboratory-confirmed cases of COVID-19 have been reported to and validated by the RKI (Table 1). The geographical distribution of cases of the last 7 days is shown in Figure 1. Please see the COVID-19 dashboard (<https://corona.rki.de/>) for information on the number of COVID-19 cases by county (local health authority).

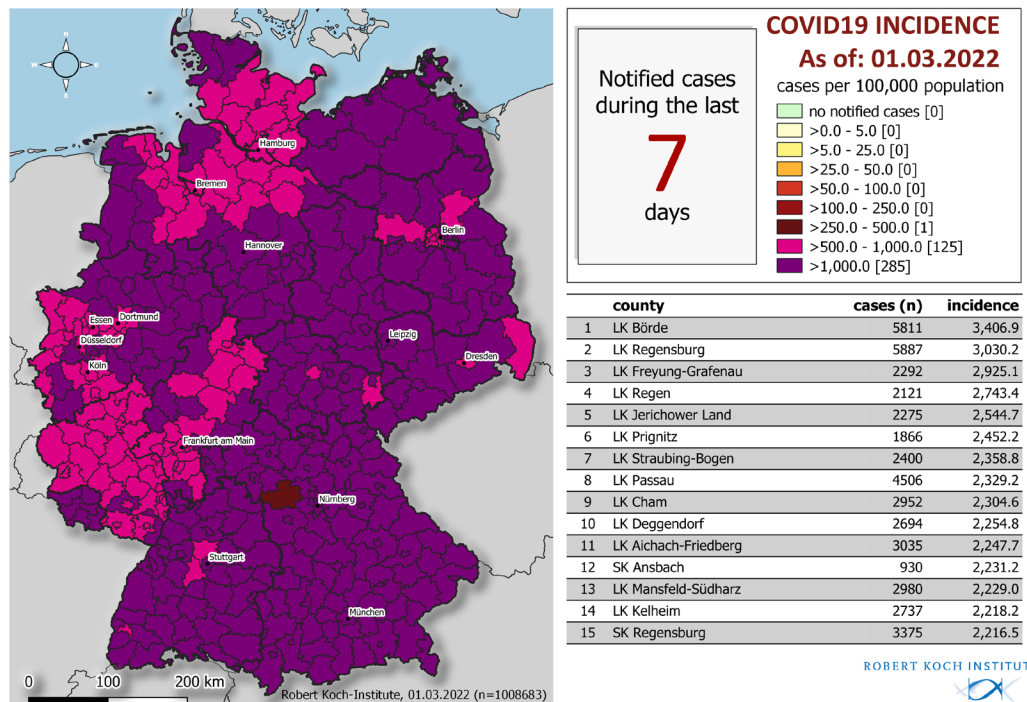

Figure 1: Number and cumulative incidence (per 100,000 population) of reported COVID-19 cases in Germany by county and federal state (n=1,008,683, 01/03/2022, 12:00 AM). Cases are usually reported according to the district from which they were transmitted. This usually corresponds to the place of residence. Place of residence and probable place of infection do not have to coincide.

Table 1: Number and cumulative incidence (per 100,000 population) of laboratory-confirmed COVID-19 cases, hospitalizations and deaths for each federal state electronically reported to RKI, Germany (01/03/2022, 12:00 AM). The number of new cases includes cases newly notified to the local public health authority, but also on prior days.

Federal State	Cumulative cases			Last 7 days			Cumulative deaths	
	Number of cases	Number of new cases	Cases/ 100,000 pop.	Cases	Cases/ 100,000 pop.	Hospitalisations/ 100,000 pop.	Number of deaths	Deaths/ 100,000 pop.
Baden-Wuerttemberg	2,107,587	20,727	18,982	155,678	1,402.1	6.69	14,278	129
Bavaria	2,792,444	24,669	21,251	221,338	1,684.4	6.00	21,371	163
Berlin	741,869	6,390	20,247	38,215	1,043.0	3.60	4,245	116
Brandenburg	517,849	6,491	20,460	36,204	1,430.4	5.25	5,183	205
Bremen	115,349	797	16,960	4,842	711.9	2.50	681	100
Hamburg	349,305	947	18,856	10,155	548.2	2.11	2,294	124
Hesse	1,068,673	6,122	16,982	57,989	921.5	6.04	9,190	146
Mecklenburg-Western Pomerania	240,114	2,814	14,907	24,787	1,538.8	16.02	1,767	110
Lower Saxony	1,050,534	10,208	13,126	91,064	1,137.8	3.92	7,465	93
North Rhine-Westphalia	3,066,829	22,839	17,109	184,031	1,026.6	6.09	22,272	124
Rhineland-Palatinate	573,947	3,817	14,004	32,222	786.2	5.05	4,995	122
Saarland	159,177	1,011	16,177	12,029	1,222.5	2.13	1,403	143
Saxony	936,839	3,992	23,092	47,544	1,171.9	4.21	14,308	353
Saxony-Anhalt	412,427	3,708	18,913	39,602	1,816.0	10.55	4,754	218
Schleswig-Holstein	322,031	4,921	11,063	25,529	877.0	5.67	2,116	73
Thuringia	412,244	2,658	19,443	27,454	1,294.9	11.41	6,615	312
Total	14,867,218	122,111	17,879	1,008,683	1,213.0	5.93	122,937	148

Quality checks and data cleaning by the local health departments and federal state health authorities can lead to corrections to cases previously transmitted (e. g. detection of duplicate reports). This can occasionally lead to negative values for the number of new cases.

Figure 2 shows the course of the COVID-19 cases per 100,000 population transmitted to the RKI on the last 7 days in each of the federal states and in all of Germany. The values for the 7-day incidence in the federal states range from 1,816 per 100,000 population in Saxony-Anhalt to 548.2 per 100,000 population in Hamburg.

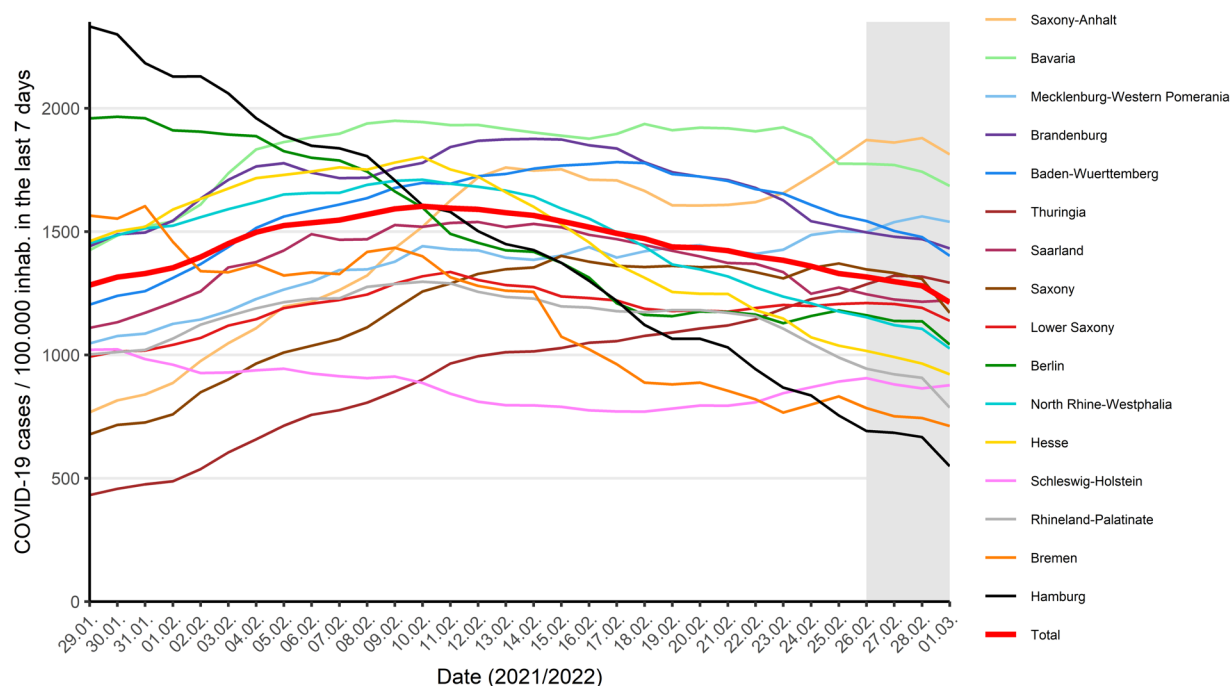

Figure 2: COVID-19 cases/100,000 inhabitants during 7 days in Germany by federal state and reporting date in the health offices (01/03/2022, 0:00 AM). The grey area delineates a range of dates with yet incomplete data, where changes in incidence are likely to occur.

Estimation of the reproduction number (R), taking into account the reporting delay (Nowcasting)

Figure 3 shows the course of estimated 7-day R-value.

7-day R-value
0.84
(95%-prediction interval: 0.78 – 0.88)

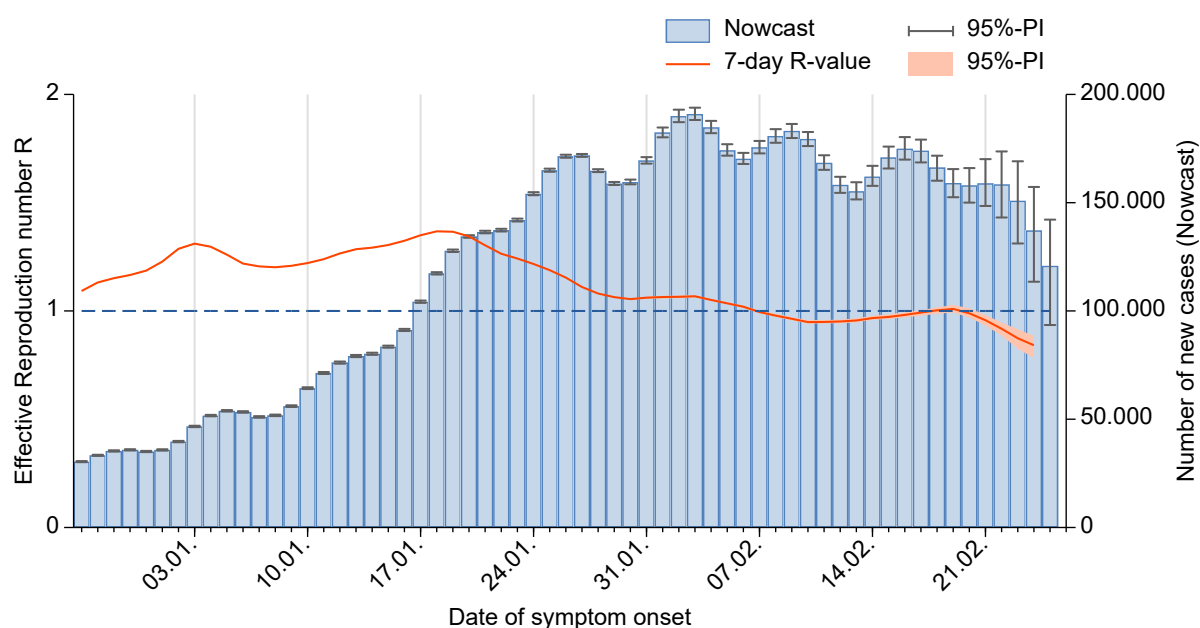

Figure 3: Estimated 7-day R-value (in orange) over the last 60 days, against the background of estimated number of COVID-19 cases according to illness onset (as of 01/03/2022, 12 AM, taking into account cases up to 25/02/2022).

The R-value is statistically significantly below 1, indicating a falling trend in case numbers.

Sample calculations as well as an excel sheet presenting the daily updated R-value can be retrieved under www.rki.de/covid-19-nowcasting. A detailed description of the methodology is available at https://www.rki.de/DE/Content/Infekt/EpidBull/Archiv/2020/17/Art_02.html (Epid. Bull. 17 | 2020 from 23/04/2020).

Annex:

Notes on data collection and evaluation

The data presented in this situation report represent a temporal snapshot. Information on individual cases can be obtained and added by the health authorities in the course of the disease. It is not possible to obtain complete data for all variables.

If necessary, the local public health authorities collect additional information, evaluate reported cases and initiate the necessary infection control measures. In accordance with the Infection Protection Act, the data are transmitted electronically by the local public health authorities to the federal state health authority and from there to the RKI on the next working day at the latest. The data is updated at the RKI daily at 0:00 AM.

Data entry and data transmission can lead to a time lag from the time the case is reported to the local public health authorities until publication by the RKI, so case numbers may deviate from those from other sources.

For the calculation of the incidences, the data of the population statistics of the Federal Statistical Office from 31.12.2020 are used. The calculation of the 7-day incidence is based on the reporting date, i.e. the date on which the local public health authorities became aware of the case and recorded it electronically. For the 7-day incidence, the cases reported on the last 7 days are counted.

On the other hand, the number of cases since the previous day, as shown in the situation report and dashboard, is tied to the date when the case is first published in the RKI's reporting. Thus, due to transmission delays, it may occur that cases with a reporting date more than 7 days ago are still included in the situation report. At the same time, the number of cases since the previous day also may contain cases that were subsequently deleted in data quality checks. Thus, the 7-day incidence cannot be readily calculated from these single-day incidences.

Notes

- 1 The number of cases since the previous day refers to the date of receipt at the RKI; due to the delay in transmission, cases from previous days may be included.
- 2 The number of active cases results from the number of transmitted cases minus the deaths and the estimated number of recovered cases.
- 3 The algorithm for estimating the number of people who have recovered assumes an average duration of illness from onset or hospitalization date on. The true length of symptomatic illness and/or sequelae are usually not available in the reporting system.
- 4 Proportion of COVID-19 occupancy by adults out of all available adult intensive care beds.
- 5 The total number of persons vaccinated at least once results from the number of reports coded as first vaccination in the transmitted vaccination data.
- 6 According to specifications for vaccination data transmission, every second vaccination or first vaccination after recovery is to be transmitted with the code as a complete vaccination. A vaccination with the Janssen vaccine is coded and transmitted as a first vaccination, but is also counted as completed vaccination series.
- 7 The total number of persons with booster vaccination results from the number of reports coded as booster vaccination in the transmitted vaccination data.
