11th OF SEPTEMBER 2024

Marie Skłodowska-Curie international fellowships provide funding for individual researchers, allowing them to diversify and broaden their scientific knowledge and skills. They are international fellowships, which means that the requested host institution for this fellowship must be located in different country than your current or most recent institutional affiliation.

The grant covers two to three years of salary, travel costs, research costs and overheads for the host institution. Individual researchers submit proposals for funding in liaison with their planned host organisation.

Who & why?

- You are a post-doctoral researcher or experienced researcher and would like to expand your experience with a long-term stay in a French multidisciplinary research team in the fields of demography, sociology, economics, history, geography and epidemiology
- You are looking for professional challenges and an international career
- You want to broaden your network while gaining experience as an independent researcher

Applying for a Marie Skłodowska-Curie Individual Fellowship at the National Institute for Demographic Studies could be your next career move!

How to apply?

- Check INED's website and find the research team you would be interested in collaborating with at:
www.ined.fr/en/research/research-teams/
- Contact the potential supervisor you have identified to confirm his/her interest in mentoring your project
- Prepare your application, with support from you future supervisor and INED's Office for International Affairs and Partnerships
- Submit your application on the European Commission Portal by the **11th of September 2024**

Proposals are evaluated on their research quality, the researcher's future career prospects, and the support offered by the host organisation.

The French Institute for Demographic Studies (INED) is a public research institute specialized in the study of populations that works in partnership with the academic and research communities at national and international levels. INED's approach to demography is resolutely open and interdisciplinary, involving a wide range of disciplines. With its 10 research units, INED promotes communication and exchange within the scientific community and the general public while conducting numerous European and international research projects.

Research Units

Fertility, Families and Couples
Gender, sexuality and inequalities
Mortality, Health and Epidemiology
Housing, spatial inequalities and trajectories
International migration and minorities
Economic Demography
History and Population
Trajectories and territories
Sexual and reproductive Health and Rights (Research team in partnership with Inserm - Paris-Sud university - Versailles Saint-Quentin-en-Yvelines University (UVSQ))
Demography of the Global South

Joint Research Unit

ELFE - French Longitudinal Study of Children
