Foreword

This working paper does not include any results of the Érfi-GGS Survey.

It is a working tool to facilitate comparative analysis of harmonized data from Wave 2 of the French GGS (ERFI) with data obtained in other countries. First it describes how the Wave 2 survey was organized in France. We draw attention to the problem of under-reporting of children, and describe the attrition observed between the two waves. The core questionnaire, annotated with all the changes introduced to adapt it to the French context, is also included.

Although great care has been taken to compare the French questionnaire with the core questionnaire, some errors may have escaped our notice. If you have any comments to make, please contact the authors to help them improve and update the content of this document (contact address: arnaud.regnier-loilier@ined.fr).

Introduction

The Generations and Gender Programme was launched in 2000 by the Population Activities Unit (PAU) created by the United Nations Economic Commission for Europe (UNECE). This programme, focusing on the structure of families and the relationships between generations and between the sexes, involves activities of two main kinds: conducting a longitudinal 3-wave survey (the Generations and Gender Surveys – GGS) on approximately 10,000 men and women aged between 18 and 79, and collecting contextual data in each of the countries involved. France, which is represented by the National Institute for Demographic Studies (INED), has participated in this project, taking part in the preparation of the Core Questionnaire on which the three survey waves were based (it was written in English before being translated and adapted by each of the countries in which the survey was conducted) and in the organization of the survey, which has been re-named “Étude des relations familiales et intergénérationnelles (ERFI)” in France. The survey itself has already been described in several papers (Vikat et al., 2005; Régnier-Loilier, 2009; Régnier-Loilier et Légaré, 2010), and will not be presented again here.

The first wave of the ERFI survey was carried out in autumn 2005 by INED and INSEE (the National Institute for Statistics and Economic Studies) on 10,079 men and women aged between 18 and 79, 88% of whom agreed to be re-interviewed three years later. A total of 6,534 respondents were re-interviewed in autumn 2008 in the second wave. The third and last wave is taking place in the autumn of 2011.

When the first wave was carried out in France, a number of changes were made to the Core Questionnaire, mainly as the result of the pilot studies conducted prior to the actual survey. Although it was intended in the GGP project to harmonize the data collected in the various countries, it was also necessary to keep more detailed records of the changes made to the questionnaire than those given in the data files. Question wording, addition or removal of response categories or of questions asked, changes in the order of some of the questions, etc., are all factors that may explain the existence of differences between countries over and above context or national specificities. This means that care should be taken when attempting to make international comparisons.

The changes made in the French Wave 1 questionnaire were described in a previous issue of INED’s Documents de travail (Sebille et Régnier-Loilier, 2007) with a view to facilitating comparisons with other countries. The present document has been written for similar purposes, but for the Wave 2 survey. Here we report on how the survey was conducted in France1, point out the problem of under-reporting of non-resident children in the second wave, and describe the attrition observed between the two waves (2005-2008). Secondly, an annotated version of the international questionnaire showing the changes made in the French questionnaire has been included. Lastly, a table summarizing the harmonized variables (which will be made available to researchers) gives an overall picture of the specificities of the French questionnaire2.

1 Part of the presentation of the second wave (in English) is taken from Ined’s Documents de travail: Régnier-Loilier A., 2010, no.165, entitled “Présentation, questionnaire et documentation de la seconde vague de l’Étude des relations familiales et intergénérationnelles”.
2 Some further changes may be made subsequently. First, the harmonized data have not yet been disseminated, and second, the use of data gives rise to progressive adjustments of the disseminated databases (as was the case with wave 1 data).
I. The Wave 2 Questionnaire

1. The main changes made to the international questionnaire between waves 1 and 2

The fact that the GGS was intended to be a longitudinal survey meant that the wave 2 questionnaire needed to follow on consistently from the previous (wave 1) questionnaire. The structure of the wave 2 questionnaire is thus very similar and the wording of questions remains the same in order to facilitate comparisons between responses in successive waves. A few changes were nevertheless made between the first and second Waves.

In particular, it had not been possible to include respondents’ occupational histories in the wave 1 questionnaire because of the time constraints imposed (the questionnaire had to be kept as short as possible). The main change made in the wave 2 questionnaire was the inclusion of a history of all spells of activity-inactivity-unemployment-training lasting at least three months since the respondents’ 16th birthday.

The time taken to administer this module was an important factor, especially in the case of the oldest respondents (up to age 82 in wave 2), and some questions had to be omitted in order to keep the mean duration of the interviews to less than one hour. In the first place, there was no need to repeat factual questions previously asked in the wave 1 interviews, such as those about the respondents’ parents (date of birth and death, country of birth, separation of the parents, date on which the respondents first started living separately from their parents, etc.). The same applied to some of the questions about the respondents themselves (country and date of birth, their original religion, etc.). In addition, the questions asked in the second questionnaire about the respondents’ previous partnerships apply only to the previous three years, whereas the wave 1 questionnaire asked for the complete history of their past and present partnerships. Furthermore, some of the questions asked in wave 1 were removed, such as the rather time-consuming ones about whether the respondents intended to start living with their partner (questions 320, 321 and 323), form a partnership, start living separately from their parents (questions 579, 580 and 582), have a/another child (questions 627 and 628), and retire (questions 857, 858 and 859). The optional modules included in the wave 1 questionnaire were also removed.

2. Specificities of the French questionnaire

Changes made in the wave 1 questionnaire which were kept in wave 2

During the administration of the wave 1 questionnaire in France, a set of changes were made. Some questions had to be reformulated because they were difficult to understand or because of recommendations made by the national statistical authorities (Comité du Label). Some questions were removed or filtered because the respondents did not always see the difference between questions in a series which looked rather similar (and therefore gave the
impression of being too repetitive or intrusive, especially in the section on fertility), and also because the duration of the interviews had to be kept to less than one hour. Some new specific questions were also added because of budget constraints (linked to funding applications), researchers’ special fields of interest, or national specificities. The additional questions were mostly about being in a civil partnerships (PACS: Pacte civil de solidarité), planning of births, difficulty in having children, and respondents’ knowledge and opinions about the French pension system. These changes in the French questionnaire have been described in a previous issue of Documents de travail (Sebille et Régnier-Loilier, 2007).

To ensure comparability from one wave to the next, most of the changes made in France for wave 1 were carried over to wave 2.

**Questions removed and added**

Some of the questions added to the French wave 1 questionnaire were removed from wave 2, when they were designed solely for cross-sectional analysis (those focusing on seasonal birth control, difficulty in having children, and knowledge and opinions about the French pension system).

In addition, some requests for further details, about the division of domestic and childcare tasks, for instance, were not included in the French wave 2 questionnaire. In the international questionnaire, respondents were asked who usually performed particular tasks, and to specify (when relevant) the person in the household other than the two partners (father, mother, grandparents, etc.) who performed these tasks. Judging from the results of the wave 1 survey, situations of this kind occur too rarely in France for meaningful statistically analysis, and these requests for further details were removed from the French questionnaire.

Conversely, analysis of the wave 1 data revealed some weaknesses or lack of clarity in the questions. This led to some parts of the questionnaire being formulated more specifically. Notably:

- Respondents who had separated from their partner but reported that their children were living with them (as specified, “for at least 4 days a week”) were asked whether the children either saw or lived with the other parent a few days a week or only occasionally. And conversely, the respondents were asked whether the children not living with them either saw or lived with them occasionally. By adding these questions, the aim is to account more accurately for children in shared custody and to prevent double counts.

- The question asked in the international questionnaire about the age at which respondents had started to live separately from their parents for at least 3 consecutive months, does not provide sufficient information for a detailed study of the transition to independence. An additional question was added to the French questionnaire about the age at which respondents had first moved into an independent dwelling not financed by their parents.

- The wave 1 questionnaire does not provide complete information on whether respondents had taken parental leave, especially in the case of part-time parental leave. All respondents in part-time employment with a child under 3 years of age were therefore asked in the wave 2 questionnaire whether they were taking part-time parental leave.

---

3 Children in shared custody might be counted as members of both parental households, which doubles their probability of being included in the sample. This information is important, therefore, both to calculate weighting coefficients but also for research questions on the relationships between children and their parents after divorce or separation.
• Respondents having an intimate (couple) relationship with someone they were not living with represented 10% of the sample surveyed in 2005. Although specific questions were asked on this point in wave 1, it was not always possible to distinguish between "non-cohabiting couples" and persons "having a relationship with someone outside the household". Some more specific questions were therefore asked in the wave 2 questionnaire: respondents were asked to give the date on which this relationship had started and to state whether they felt the relationship was a "couple relationship" or a "romantic relationship". These details should help to distinguish more clearly whether the persons live apart from their partner by choice or by obligation, and to link these results in with those of the 1994 FFS-ERFE survey (in which this point was dealt with more fully), and thus to measure any changes in this phenomenon over time.

• A question frequently included in INED surveys (1974, 1988, 1994 and 1998-2003) about changes in birth control in France since the 1970s was added to the questionnaire. The following question was asked about the arrival of each child born between the first two waves: "Did you want that child to be born at that particular time in your life/ later/ not at all/ earlier /you had not even thought about it?".

In addition, two questions included in the international questionnaire but removed from the French wave 1 questionnaire were brought back in wave 2. Their absence was considered "regrettable" by researchers, for analysis at both national and international levels. These questions are:

• For unemployed respondents: "How satisfied are you with being unemployed? Please use this card and tell me the value on the scale (ranging from 0 = not at all satisfied to 10 = very satisfied). There were several reasons for including this question. First, it was asked to all respondents, whatever their employment status, in order to measure their well-being and its effect on intentions and behaviours (it is a subjective indicator, a proxy for utility functions widely used in economics). Likewise, this question provides a means, in association with other variables, to distinguish between "voluntary" and "involuntary" unemployment;

• "Here is a list of qualities that children can acquire. Which, if any, do you consider to be especially important? Please choose up to three and mention them in the order of importance".

**Retrieval of information obtained in wave 1**

The French questionnaire was produced using CAPI software. This made it possible to "retrieve" some of the data collected in wave 1 in order to filter certain questions. For example, the question "Is your father still alive?" was put in 2008 only to those respondents whose father was still alive in 2005. Twenty or so variables from wave 1 were retrieved in this way and used to filter the wave 2 questionnaire.

This information retrieval had several advantages: it shortened the length of the interviews, prevented contradictory information from being collected between two waves and saved the respondents from having to answer sensitive questions (those referring to deaths, separations, religion, etc.) more than once. In addition, when respondents were asked about their detailed employment histories, it provided them with several chronological landmarks (the age at which various events occurred, their children’s year of birth, etc.) to help them remember sequences of events and dates.

Respondents were never confronted with their previous responses to the 2005 questionnaire (no questions such as "In 2005, you stated that...").
No requirement for specific consent in 2008

In 2005, the following two questions were qualified as "sensitive" by the French statistical authorities:

- What is/was your present/original religion?
- Are you in a civil partnership (PACS)? Yes / No

The first of these questions required a direct answer about the respondents' religion, while the second was liable to suggest their sexual orientation. Respondents were therefore asked for their written consent before their responses to these two questions were recorded (a document to be dated and signed at the end of the interview). The responses of those who refused to sign (6% of cases) were erased.

There was no need to carry out this procedure in the Wave 2 survey. The question about religion was no longer included in the questionnaire, and, in 2008, the question about PACS partnerships was no longer regarded in France as sensitive.

II. Implementation of the wave 2 survey in France

1. Testing the survey

The main change in the questionnaire was the addition of the grid to be completed by respondents, giving their occupational history since their 16th birthday. Since completing this grid was liable to be a difficult task in some cases (because of memory problems, especially among older respondents, since they were asked to record all spells lasting at least 3 months with an error margin of only one month), a special test was run. The results of this test showed that it was feasible to include this grid and gave an idea of the time required to complete it.

The complete questionnaire, which was basically very similar to the one used in wave 1, was tested only once, from March 24 to April 25, 2008, in two different parts of France (Aquitaine and Limousin) on approximately 200 people. Although this was a longitudinal survey, the test could not be run on people who had participated 3 years previously. In order to check the "the retrieval chain of data collected in 2005" the test questionnaire was preceded by a short module focusing on the respondents' situation "3 years previously".

This test therefore involved 2 stages: first the interviewer administered a short questionnaire containing twenty or so questions designed to obtain the information required to filter the main

---

4 It was not possible to use the addresses of the 2005 respondents for the test, since each address had to be left unchanged for the main survey. One possible solution might have been to re-interview all those who took part in the preliminary wave 1 tests, but these respondents' addresses had not been updated and their responses had not been registered in a directly usable form in a database.

5 Some of the data collected in 2005 were used in the questionnaire to filter some of the 2008 questions. For example, for people who had already stated in 2005 that their parents were dead, we avoided asking in 2008 whether they were still alive; this question had nonetheless to be put to respondents whose parents were still alive in 2005.

6 To use the same example, the respondents were asked in the preliminary questionnaire whether their father/their mother was still alive in 2005, after explaining carefully that this was just a test and that this information was necessary for the test to be carried out properly.
questionnaire (those which were to be retrieved from wave 1 during the wave 2 survey); the interviewer then tested the wave 2 questionnaire in full.

2. Updating respondents' addresses between the two waves

The respondents interviewed in 2005 who agreed to being re-contacted in 2008 for a second interview were all "tracked" by INED’s Surveys Department. They were contacted by mail five times between the two waves, i.e., approximately every six months (information about initial results, New Year greetings cards, etc.) in order to limit attrition and update the address files (changes of address, removal from the sample of deceased persons or persons who had decided to drop out of the survey, etc.). When the mail was returned unopened to INED (because the person had moved away, for example), a search was systematically carried out for the person's new contact details via the Internet or by using all the information available on their follow-up file (their home and mobile telephone numbers, those of the contact persons mentioned, etc.). Details of exits from the sample and attrition are given in Part III.

3. In the field: interviewers, interview conditions and data quality

Logistics of the survey

The main wave 2 survey took place three years after the wave 1 survey, from 20 October to 29 November 2008, with an extension up to 12 December 2008 to provide enough time to manage transfers of addresses between interviewers for respondents who had moved.

The Wave 2 data collection process mobilized 454 interviewers. INED and INSEE did their best to re-enlist the interviewers who had dealt with wave 1 because they were familiar with the questionnaire, had already established contacts with the households, and could trace respondents more easily, etc. As in wave 1, the interviewer instructors from each of INSEE’s regional departments attended a 1-day training session at INED (presentation of the survey, the questionnaire, etc.) before going back to train the interviewers recruited in their own region.

The survey took place under the same conditions as wave 1: the questionnaire was prepared using the CAPI software program, the interviews were conducted face-to-face, no proxy respondents were allowed, and no third parties were to be present during the interview if possible. If the people interviewed in 2005 were no longer present in the household, the interviewer made an appointment to meet them, and if they had moved to another zone, another interviewer was given the new address. When respondents interviewed in 2005 had gone to live outside the regions normally covered by the survey (but within metropolitan France), the interviewers made an exception by going beyond their usually allotted zone to meet them. No telephone interviews were allowed, except in 2 highly exceptional cases, after obtaining the authorization of the survey designer. Previous respondents who had gone to live abroad or in institutions (such as retirement homes) were not interviewed.

---

7 These surveys were carried out over the whole of France, but only in specific zones. Some zones were therefore not covered by the interviewers.
Duration and conditions of the interview

Each interview lasted 55 minutes on average, although there were fairly large differences, depending on the complexity of the respondents’ occupational history, and hence on their age.

No major problems were encountered during the wave 2 data collection process. The interviews were conducted face-to-face more frequently than in wave 1. A third party was present in 25% of the 2005 interviews, whereas this percentage dropped to 18% in the 2008 interviews. This difference was no doubt due to the fact that the wave 2 interviewers were reminded at the training session how important it was to be alone with the respondent. A special study conducted during Wave 1 showed how strongly the responses can be affected by the interview conditions (Régnier-Loïlier, 2007). The main problems encountered by interviewers on the field concerned the occupational history grid, which was not always easy to complete, especially for the older respondents (the oldest of whom were 82 years old). As in wave 1, the section about “values and attitudes” (questions of opinion) was thought by some interviewers to be rather too long, as discussions often arose about how to interpret many of the questions. The interviews went very well on the whole, however, as shown by the high percentage of respondents (97%) who agreed to be re-contacted in 2011 to answer the third and last questionnaire.

Severe under-reporting of non-resident children

However, after data adjustment and cross-matching between waves 1 and 2, severe under-reporting of children in Wave 2 was brought to light. In 8% of cases, respondents reported fewer children than in 2005, and this proportion increased to 14% among the over-50s (age in 2005) (figure 1).

A more detailed analysis showed that in most cases, the persons concerned had reported having one or more non-resident children in wave 1 but had reported none in wave 2. There were also a very small minority of cases where resident children reported in wave 1 were no longer reported in wave 2 (the children were probably no longer living in the respondents’ household). In some even rarer cases, children had been declared in wave 1 as both resident and non-resident (double counts), and some deceased children reported in wave 1 were no longer mentioned in wave 2.

Note that this indicator under-estimates under-reporting, since it was calculated on the basis of all the survey respondents, including those who had no children in wave 1 (and who therefore could not report having fewer children in wave 2).

A closer analysis is under way, which will be developed further once the datasets obtained in the three waves have been compared, in order to elucidate the reasons for this under-reporting. It was definitely not due to “interviewer” bias, since similar rates of under-reporting were observed for all interviewers. Mortality (and under-reporting of deceased children) does not suffice to account for these anomalies. It may be a panel effect: the respondents may have assumed that there was no need to report again all the non-resident children previously reported in wave 1; or they may have reported no non-resident children because they remembered that a long list of questions was asked in the questionnaire about each child.
4. The final sample

Out of the 10,079 respondents who took part in the 2005 survey and were included in the database, 6,534 also participated in 2008 (the attrition is discussed in Part III). Among these respondents, 97% agreed to being contacted again for the third and last wave, scheduled to take place in 2011. The same basic follow-up procedure was used with these respondents between waves 2 and 3 (two letters each year: initial results and a New Year greetings card, etc.).

5. Funding

The external costs of wave 2 (the interviewers’ salaries and travel expenses) were covered by INED, the CNAF (Caisse nationale d'allocations familiales) and DREES (the French Ministry of Labour’s Directorate for research, assessments and statistics). The internal costs (survey designers at INED and INSEE, correspondence, travel expenses, supervision of data collection, questionnaire software, etc.) were covered by INED and INSEE.

6. Weighting and use of the data obtained

As mentioned above, the sample interviewed in wave 2 consisted entirely of respondents who had participated in wave 1, but did not include all the wave 1 respondents. Between the two waves, attrition of approximately 35% occurred (some people refused to participate in wave 2, some had died, some had moved without leaving an address, and some had gone to live in institutions). Since the attrition was not due to random causes, the sample interviewed in 2008 is in no way representative of the French population as a whole in 2008.
The data can therefore only be used in a longitudinal approach, or a cross-sectional approach representative of 2005, provided that a weighting variable is applied to correct for attrition and to fit the 2008 findings with those of 2005. Given the extent of attrition, any cross-sectional use of these data (bearing in mind that they are representative of the population surveyed in 2005 only) will be less accurate, and prior checks will be needed to ensure that distortion on the variables of interest is not significant.

Sebille P., Régnier-Loilier A. (2007), Modifications to the Generations and Gender Survey Questionnaire in France (wave 1). L’étude des relations familiales et intergénérationnelles (Erfi), Documents de travail, n°144, INED, 191 pages.

III. Sample Attrition Between French GGS Waves 1 and 2

In autumn 2005, INED and INSEE carried out Wave 1 of the ÉRFI survey (Étude des Relations Familiales et Intergénérationnelles). The same respondents were surveyed again three years later in autumn 2008, and Wave 3 is planned for the end of 2011. As with all surveys repeated over time, the initial sample of some 10,000 respondents diminished at a relatively high rate and only 6,500 answered the second questionnaire, an attrition rate of 35%. To reduce attrition as far as possible, particular care must be given to sample follow-up, with efficient management of “address cards” and systematic recording of a “contact person”.

Panel surveys in which the same people are surveyed more than once (at varying intervals, which may be three months, a year, three years) have been increasingly used in France in recent years. Originally most common in English-speaking countries, often for medical and epidemiological purposes, these longitudinal studies have found other applications for various themes in the social sciences. Recent examples include the Génération 98 survey by CERÉQ on the early careers of young people after their initial training (three waves of data collected at two-year intervals), the Intentions de Fécondité survey by INED (in three waves from 1998 to 2003) on obstacles to achieving intended fertility, and the “Cocon” survey (contraceptive cohort, surveyed annually from 2000 to 2003) by INSERM to monitor contraceptive practices over a person’s life-cycle.

Building on this type of survey, the Population Activities Unit of the United Nations Economic Commission for Europe (UNECE) has been running the Generations and Gender Programme (GGP) since 2000. One of its purposes is to promote the holding of the same survey at international level on the general topic of the family (for more details, see Vikat et al., 2005). It comprises three waves, at three-year intervals, designed to collect a greater quantity of much more specific data on the sequence of demographic and biographical events than are provided by cross-sectional surveys. The longitudinal nature of the Generations and Gender Survey (GGS) also makes it possible to study correlations between changes in income, values and opinions, for example, and changes in behaviour. People cannot be asked to say in hindsight what they thought or what they earned five years earlier: the quality of the information would be debatable since people cannot exactly remember their income or opinions years before (with a high risk, in the case of opinions and values, of ex post rationalisation). Not least, the prospective dimension of the surveys includes a number of questions about intentions (moving home, forming a couple, marrying, having a child, changing jobs, etc.) which can be compared with observed behaviour in subsequent years. It is then possible to identify the factors and events that hinder or facilitate the achievement of these intentions.

Together with INSEE, INED joined this project by carrying out its “study of family and intergenerational relations” (ÉRFI), the French version of the GGS questionnaire and survey protocol (UNECE, 2005; Régnier-Loîlier, 2006b). The survey was designed on the same principles as a “household” survey and Wave 1 was conducted in autumn 2005 with 10,079 respondents aged 18 to 79. The plan was to re-survey the same people three years and six years later. Wave 2 was conducted in autumn 2008.

11 Institut national d’études démographiques.
12 Institut national de la santé et de la recherche médicale.
However, the organisation of this type of survey is no simple task. In addition to the costs incurred, there are a number of methodological problems, particularly attrition, i.e., the impossibility of surveying all the respondents in successive waves. Monitoring a group of people over a long period is difficult to do for a number of reasons. First, in each wave there is the risk that a number of people will leave the panel and refuse to answer any further questionnaires (the questions may have been perceived as intrusive or offensive, or the interview may have seemed too long, etc.). Second, the respondents are subject to a number of events that may cause them to change their address: new job, birth of a child, separation, move to a nursing home. Although some countries can rely on population records to update individual addresses, this cannot be done in all cases. In France, for example, it is not permitted to use recent data from social security or taxation files to update the address cards. Finally, as for all population groups, members of the panel may die.

These various reasons for leaving the sample (refusal, loss of address and death) do not affect all the Wave 1 survey group in a random manner: death concerns older respondents more, loss of address is more frequent among the most mobile (particularly the youngest), and refusal occurs more among the more distrustful respondents and those who do not see the value of the survey for themselves. Since the reduction in the sample is differential, the risk arises of bias in the results of longitudinal analyses. Although the observed attrition for the “Cocon” survey mentioned above — one-third of the initial sample after three waves – does not seem to have caused significant bias in the main variables under study (Razafindratsima et al., 2004), the consequences are more marked for the Intentions de fécondité survey, where attrition was close to 70% after five years, requiring caution in the interpretation of the longitudinal data (Mazuy et al., 2005).

Attrition is consequently a major factor for success or failure in collecting longitudinal data. Considerable effort must be made to minimise losses between waves. It is also essential to identify the characteristics of those individuals most likely to drop out in order to evaluate any possible impact on the results. These characteristics may first be used to calculate a correcting factor to be applied in the statistical analysis of the longitudinal data. Understanding the risk factors of attrition is also useful in anticipating certain losses in future surveys and adopting appropriate strategies to achieve a panel that remains representative. For example, one may overweight certain categories of respondent in drawing the initial sample in order to have enough respondents in the final wave; one might also pay closer attention to following up certain categories, etc.

The purpose of this paper is to describe the attrition in the ÉRFI survey sample between 2005 and 2008 on the basis of mainly sociodemographic criteria. It contains, however, no discussion of the evaluation of any attrition-based bias to the survey’s variables of interest.

At the end of the ÉRFI survey Wave 1 questionnaire (2005), the interviewer asked each respondent “We are thinking of coming back in three years to interview the people who answered this questionnaire. Do you agree to INED contacting you again in three years, without committing yourself to anything?” If the respondent agreed, the interviewer filled in and had the respondent sign a “follow-up card” with their address and, where possible, the address of one or two “contacts” (if the respondent moves away, these contacts can be used to find their new address).

These are only the “major categories” of reasons for leaving the sample. Other “losses” may include data capture errors that destroy the link between a respondent and their address, people absent when the data are collected, etc. Further details are given below.
Of the 10,079 respondents in the ÉRFI survey Wave 1, 8,949 agreed to being contacted for a second survey, a refusal rate of 11.2%. After the survey, each respondent received a letter of thanks, in which those who had not agreed to being followed up were asked if they “really” did not wish to take part in Wave 2. This retrieved a further 150 people, so that the final refusal rate was just under 10%.

The INED survey department had the task of following up the panel from 2005 to 2008 and regularly updating their addresses. To that end, five letters were sent out to the respondents, one every six months: the letter of thanks; a 4-page summary of initial results (Régnier-Loilier, 2006a), an 8-page summary of further results (Bauer, 2007) to engage their interest in the study; a New Year’s greetings card for 2008; the announcement of Wave 3. Sending the letters was a way of checking that the respondents were still living at the same address14, and of reminding them to send us their new address if they moved. A website was also set up before the data collection began to give the survey some “visibility” and encourage participation in the panel (www-erfi.ined.fr)

After three years of follow-up, the sample for Wave 2 contained 8,341 address cards. So contact had been lost with just over 750 people from 2005 to 2008 (moved without leaving an address, death and a few refusals to continue). In 70% of the cases, these “drop-outs” had not given the address of a contact (compared with 45% of those still in the panel) and we had no telephone number for 54% of them (compared with 8%), which reduced the chances of finding the respondent’s address15.

During Wave 2 in autumn 2008, only 6,576 respondents were surveyed. The discrepancy between the address database and the number of interviews (1,765) was mainly due to “wastage” (Table 1), comprising 794 refusals to take part in Wave 2 (51%), 249 moved without leaving an address (16%), 221 who could not be contacted (14%), 190 interviews that could not be held (12%), 77 interviews that could not be held before the end of the collection period, and 16 cases in which none of the residents at that address corresponded with the person to be interviewed. There were also 210 “out of scope”, of whom 75 had died (36%), 52 had left the country (25%), and others moved into nursing homes or accommodation that could not be located. Some interviews were only partially completed and were therefore not included in the final database. Of the 6,576 interviews completed, 42 were removed from the circulation database because the people who answered in 2008 were most certainly not those surveyed three years earlier.

The total attrition rate between Waves 1 and 2 of the ÉRFI survey was therefore 35% (leaving 6,534 observations). To simplify further discussion, three types of situation are distinguished: the respondent refused to continue the survey after Wave 1 (10% of the initial sample); contact with the respondent was lost from 2005 to 2008 or they no longer lived at that address when the interviewer went there in autumn 2008 (10% of cases); the respondent refused to take part in Wave 2, was out-of-scope (dead, nursing home, abroad, etc.) or absent when the interviewer came to their home (15%).

---

14 When people move, their mail may be redirected automatically by the Post to the recipient’s new address or, if they have not arranged for that to happen, returned to sender stamped NPAI (no longer living at this address). We were then able to launch a procedure to find the respondent’s new address, either by contacting them directly (if they had agreed to give their telephone number), or by the internet, or via the “contact persons”, if we had them. If none of these procedures worked, we sent another letter to the last known address. If it was returned stamped NPAI, the respondent was considered to be “lost” and was removed from the follow-up database.

15 Note that the “contacts” were not “followed up” and so their addresses were not updated between surveys.

### 2. Geography of attrition

The ÉRFI survey sample was restricted to Metropolitan France. Attrition varied first by region (Figure 1), exceeding 40% in Corsica (51%), Languedoc-Roussillon, Provence-Alpes-Côte d’Azur (48%) and the Paris region Île-de-France (41%). This latter region is particularly difficult to survey because it is harder for interviewers to gain access to multi-storey buildings and people change jobs frequently; the Mediterranean regions contain more second homes and a higher rate of address loss between waves (16% compared with a national average of 6%). Conversely, four regions post a significantly lower attrition rate, below 30%: Pays de la Loire (24%), Picardy (28%), Brittany and Auvergne (29%).

Similarly, attrition was lower in smaller communes, under 30% in places with fewer than 5,000 population. This low rate is largely explained by much lower loss of contact between the waves (less than 6% compared with a national average of 10% and more than 13% for municipalities of over 200,000 population).

---

16 The follow-up cards from one interviewer were never returned to INED, causing the loss of 34 respondents in the 15th arrondissement of Paris.
17 Despite the non-reception of follow-up cards from one interviewer, a loss of 24 respondents.
Attrition is extremely high among respondents of non-French nationality, particularly North Africans, where it is as high as 65% (Figure 2). First, the rate of refusal in 2005 to participate further in the panel is higher for these groups, as is loss of address. On the latter point, seven out of ten non-French respondents gave no contact person (compared with one out of two French respondents), which explains the higher proportion of “loss of contact”.

Source: INED-INSEE, ÉRFI-GGS1-2, 2005-2008
3. Type of household and housing tenure

Attrition is also closely correlated with housing tenure (Figure 3). Owners with mortgages, who are more likely to have been living at that address for a short time and less likely to be thinking of moving in the immediate future, post the lowest attrition rate (25%), partly due to relatively low loss of contact from 2005 to 2008 (6%). Conversely, loss of contact was much higher among tenants (15%), who had a total attrition rate of 42%.

This is hardly surprising, particularly when related to the probability of geographical mobility (Table 2). In 2005, 87% of homeowners, with or without mortgages, stated that they did not intend to move in the next three years (aggregate of “definitely not” and “probably not” responses) compared with 42% of tenants and those living rent-free. This implies that for the follow-up from 2008 to 2011 it would be useful to pay greater attention to people who intend to move. They might, for example, be contacted rather more often.

Furthermore, residential mobility, easier for smaller households, causes higher attrition among single-person households (41%). Two effects combine here: the larger the household, the lower the refusal in 2005 to participate further in the panel and the lower the rate of address loss (Figure 4).
Related to these results, there is significantly higher attrition among people with no spouse (41%) than those in a couple, whether married or not (32%). Note, however, that attrition among unmarried couples is due more to loss of address from 2005 to 2008 (11% compared to 7% for married couples) than to refusal in 2005 to participate further in the panel (7% and 9%). Similarly, taking those with no spouse and those with a non-cohabiting spouse (Living Apart Together), the reasons for attrition are different: the LATs post a higher loss of contact (15%) than the singletons (12%), but significantly more singletons refused in 2005 to participate further in the panel (14% compared with 9% LATs) (Figure 5). This correlates with respondents’ sociodemographic characteristics, especially age.

4. Age-related attrition

Although attrition varies little by respondent’s gender (whether total rate or reasons), age effects are of particular interest (Figure 6). Attrition is high at the two ends of the age pyramid (in 2005), exceeding 40% in the 18-26 and 75+ age groups. The reasons, however, are quite different. Among the young, agreement in 2005 to participate further in the panel is high and attrition is due more to loss of contact between the two waves. This is the most “mobile” group (those interviewed while still living with one or more parents may have moved out, for higher education in another town, to get a job, or to form a couple). Among the elderly, on the other hand, the attrition rate is largely due to refusal in 2005 to participate further in the panel (some 20% after the age of 75) and to more frequent exits from the sample by death or “out of scope” (nursing home).

5. Attrition and social group

The age effect on attrition can be seen in educational qualifications (Figure 7). Those respondents still studying in 2005 (the youngest) posted high attrition (42%), largely due to loss of contact from 2005 to 2008, and to “refusals in 2008”, a category, as explained above, that covers a range of situations (no occupant corresponds to the 2005 respondent, long-term absence, moved abroad, etc.). Unqualified respondents (who had completed their education), on the other hand, were older on average. They also had a high attrition rate (48%), due mainly to an above-average rate of refusal in 2005 to participate further in the panel (19% compared to 10% for all 2005 respondents).

Attrition is consequently and unsurprisingly much higher among the professionally inactive, for whom it is 45% (Figure 8). It is lower among managers and high-level intellectual occupations, middle-level occupations and farmers, with this last group being less mobile (address loss from 2005 to 2008 is low, some 4%).

6. Results confirmed *ceteris paribus*

The descriptive results show a marked effect of age and the variables correlated with age. To measure the specific effect of each variable, a regression was run to estimate the probability of total attrition between the waves, *ceteris paribus* (Figure 9).

In addition to the risk factors already described, the aim was to examine the effect on attrition of two further variables: respondent’s perceived state of health in 2005 (health was given to the survey department as a reason for refusing to participate in the second wave by people who had agreed to do so in 2005) and agreement/refusal to sign the “specific permission” at the end of the 2005 questionnaire. In Wave 1, respondents were asked their religion (Catholic, Muslim, etc.) and the unmarried ones whether they had contracted a civil union. These two items were considered to be “sensitive” by the Quality Label Committee of the French National Council for Statistical Information (CNIS)\(^{18}\) and required each respondent to sign a document indicating that they agreed to have their responses to these questions recorded. Although respondents were reminded that the data were confidential and that no link could be made between the personal information and the responses to the questionnaire, the fact of having to sign a document with their name and address on it caused 6% of respondents to refuse to allow their responses to these two questions to be recorded (although the vast majority of them had answered the questions). The refusal to sign might be linked to the refusal to participate further in the panel (it might also be a “refusal on principle” to sign any document that contained personal information). Educational qualifications, on the other hand, were not included in the regression because of near-collinearity with socio-occupational category.

Compared with the “reference person”\(^{19}\), whose probability of not responding to Wave 2 is estimated by the model at 31%, women are significantly less likely than men in the same situation not to have participated in 2008 (29%), *ceteris paribus*. The age effect is also confirmed: compared with the 30-34 age group, respondents aged under 25 or over 75 in 2005 have a higher probability of not participating in Wave 2. Non-French nationals displayed noticeably higher attrition than French respondents, with an estimated probability of 50% for North Africans compared with 31% for the French, *ceteris paribus*. In terms of socio-occupational categories, lower attrition among managers and high-level intellectual occupations (28%) and higher attrition among the inactive (36%) are confirmed.

Most regions saw lower attrition than Île-de-France, except for Provence-Alpes-Côte d’Azur and Languedoc-Roussillon (36% and 38%). Lower attrition in communes under 5,000 population is also confirmed. Mortgagees were lost contact with from 2005 to 2008 less than outright owners (27% compared with 31%), unlike tenants, whose estimated attrition probability was 37%, despite inclusion in the model of the question of intention to move. Those most sure of moving in the three years after Wave 1 also displayed higher attrition (40%). However, persons living alone, whose gross total attrition rate was higher (Figure 4), did not show more attrition than an adult living in a childless couple, *ceteris paribus* (particularly when age is considered).

The two variables added to the regression model (perceived state of health in 2005 and signature of explicit permission) have a major effect on the probability of attrition. The estimated

---

\(^{18}\) The civil union item was classified as “sensitive” in 2005 because it was likely to describe “persons’ sexual orientation”. However, even in 2005, statistics showed that most civil unions (PACS) were not between homosexuals. It is also surprising to note that the gender of the occupants of the dwelling in the household composition table of the household survey, which can then be used to deduce relationships (spouse, etc.) is not considered to be sensitive information on this score, although it does more accurately describe “persons’ sexual orientation”.

\(^{19}\) Namely a respondent possessing all the following characteristics in 2005: male, aged 30-34, resident of Île-de-France, outright homeowner, agreed to sign the explicit permission at the end of the 2005 data collection, in self-perceived very good health, “definitely not” intending to move, living in a childless couple, French and a white-collar worker.
probability is as high as 50% for respondents considering themselves to be in poor health (compared with 31% in “very good health”). For the 6% of respondents who refused to sign the explicit permission, the figure was 66%, ceteris paribus. On this latter point, it may be supposed that the observed correlation between attrition and explicit permission to record the answers to the civil union and religion questions reflects an attitude of principle or distrust on the part of the respondent towards documents to be completed and signed. It cannot be concluded from this result that the explicit permission procedure encouraged attrition among those who refused to sign, especially since the survey designers had taken the precaution of first asking the respondent if they agreed to take part in the panel; only later were they reminded that some questions were considered to be “sensitive” and required written agreement.

Figure 9. Estimated probabilities (%) of attrition (logit model)
Conclusion

To summarise, the observed attrition between Waves 1 and 2 of the ÉRFI survey was not random but affected particular categories of respondent. Those living alone, male, young or elderly, non-French nationals, resident in the Paris region or the Mediterranean regions, tenants, economically inactive, or in poor health were less likely to participate in Wave 2, findings relatively "close" to those observed in other longitudinal surveys (Razafindratsima et al., 2004; Mazuy et al., 2005; Couppié et al., 2007). The Wave 2 data can therefore only be used if they are weighted by a factor calculated to correct for the distortion of the sample by differential attrition. Only then will the results obtained be representative of the French population in 2005 (and not 2008).

If for whatever reason it is not possible to individualise the follow-up of a sample, one might examine monitoring at more regular intervals those persons with a higher risk of "loss of contact". However, the implementation of this procedure would require the possibility of linking respondents’ personal data (addresses) and some of their responses to the questionnaire. This cross-correlation is not allowed by the French data privacy authority CNIL, in order to guarantee the confidentiality of responses.

However, we have seen that the people lost contact with from 2005 to 2008 were also generally those for whom we had no address of a contact person or telephone number. Since these data are linked to respondents’ addresses, it might be possible, for the period between ÉRFI survey Wave 2 and Wave 3 (planned for 2011), to consider a more regular follow-up of those persons for whom we have no additional information. When a respondent moves, their mail is often automatically transferred to their new address, but the period of this transfer does not often exceed a few months. So reducing the interval between the letters sent out (reminding the respondent to give us their new address if they move, by telephone, e-mail or post) would increase the likelihood of obtaining that new address. But the difficulty remains of determining the right frequency of letters to optimise follow-up without harassing the respondent.

At all events, during training the interviewers should be carefully reminded that it is essential to have the contact details of at least one contact person, because of the crucial importance of this information for follow-up. Any differential attrition of the sample may have major consequences for the statistical analysis. Although weightings or factors can be calculated to correct for attrition, analysis of the data is only useful and possible if any distortion of the sample has been limited and attrition does not directly affect the survey’s variables of interest.

IV. Changes made in the French Wave 2 questionnaire

Legend

Addition of filter in a question

If the respondent obtained at least one degree

113. What was the main subject matter of these studies?

Addition of a question

Do you habitually live in another independent dwelling unit?

1. Yes
2. No
9. Does not know

Addition of a filtered question

If the parents broke up between Wave 1 and Wave 2: When did that happen?

Indicate the year (2005 to 2008, do not know)

Addition of a response category

119. Does your household own or rent this accommodation or does it come rent-free?

owner
tenant or subtenant, paying rent
accommodation is provided rent-free
other

1501 – becoming an owner

Removal of a question and/or of a response category

1202. Generally speaking, would you say that most people can be trusted or that you need to be very careful in dealing with people?

most people can be trusted
need to be very careful

Precision of a question and/or a response category: addition or removal

332. Have you ever lived together with him/her (for at least three months)?

307. In which month and year did you start living together with this partner?

Other modification or information

101. Sex of respondent.

Comment: answer retrieved from Wave 1
Select M/F in Household Grid.

815. Do you intend to start / resume your education within the next three years?

Comment: this question was asked in the Household section, education subsection
definitely not
probably not
probably yes
definitely yes
In the French questionnaire, certain response categories were added, clarified or modified. In certain questions, the answers "Does not know", "Refusal" or "Is not concerned" were sometimes added. To facilitate the reading of the questionnaire which follows, we chose not to identify these modifications.

**Modification of response categories**

For questions concerning the month when an event occurred, the coding enables respondents to answer with one of the four seasons
- 1 to 12 (months)
- 13 = winter, 14 = spring, 15 = summer, 16 = autumn
- "Does not know"

The "does not know", "Refusal" and "is not concerned" modalities were included in several questions.

**Additional filters: coding**

For certain questions, additional filters were implemented, for most cases to not ask a question to respondents which were not concerned.

In all these cases, the respondents who should be included in the filter of the core questionnaire but were not asked the question because they were not concerned are coded "not applicable" in the harmonized dataset (codes 9,99,999 or 9999).

For example, in question 405.e, the filter "if children in the household" was added.

405. We have already talked about the various tasks that have to be done in a household. Now I would like to ask you some questions about decisions. Who makes decisions about the following issues in your household?

   e. If children in the household the way children are raised

As respondents without children were not asked this question because they were not concerned, they are coded "9. Not applicable" in the harmonized dataset.
Address file

You need to interview [first name] who was born in [month/year], his/her address is reported on the address file

Could the address file be treated?
1. Yes
2. No
   *If not*: Why?

Does [first name] still live at the address reported in the address file?
1. Yes
2. No, his/her address changed
3. No, he is deceased
4. Impossible to reach the address
5. Impossible to localize the address
6. None of the household matches the data known from 2005 (wave 1)

Where does [first name] currently live?
1. he lives in France, in a regular dwelling
2. he lives in an institution in France
3. he left for French overseas departments or abroad
4. he left without leaving an address

Finally,
1. I could find the person
2. I could not find anyone

Did you need to contact one of the contact persons to get in contact with [person]?
1. yes
2. no
3. without object (no in the address file)

What was the result of the contact?
1. The household agreed to be interviewed
2. The interview couldn't be carried out
3. The household Refused to be interviewed (directly or indirectly)
4. The interview couldn't be carried out before the end of the survey period.

*If answer=2*: Why couldn't the interview be carried out?
1. The person present is ill or disabled
2. Other reason

*If answer=4*: Why couldn't the interview be carried out before the end of the survey period?
**New address file**

What is the family name of [first name]?
Indicate the street number
Indicate the street supplement
Indicate the street name
Indicate the address supplement
Indicate the building
Indicate the stair
Indicate the floor
Indicate the localization on the floor
Indicate the door number
Codification of the new town

**Town**

**Does [first name] live next to your sector and are you able to carry out the survey?**
1. yes I am able to carry out the survey
2. No I am not able to carry out the survey

*If the person moved*

**Could the address file be treated?**
1. Yes
2. No

*If not: Why?*

**Does [first name] still live at the address reported in the address file?**
1. Yes
2. No, his/her address changed
3. No, he is deceased
4. Impossible to reach the address
5. Impossible to localize the address
6. None of the household matches the data known from 2005 (wave 1)

**Where does [first name] currently live?**
1. he lives in France, in a regular dwelling
2. he lives in an institution in France
3. he left for French overseas departments or abroad
4. he left without leaving an address
**Interviewer Instruction: Write in the time and date when the interview starts.**

001. Interview started at __________________ on _____________________________

**Interviewer Instruction: Read the following text.**

This survey is a continuation of the Generations and Gender Survey in which you participated three years ago. It is part of an international programme co-ordinated by the UN Economic Commission for Europe. An interesting feature of our research is that it tries to follow the lives of people over a long period of time.

The aim of this research is to learn more about the everyday life, circumstances, and opinions of people and families. We want to gather information about the factors that influence the formation of new families, childbearing and preparation for old age. We also want to gather information about the lives of the young, middle-aged and old generations. This survey will show how people’s life and family circumstances have changed over time, which will improve understanding of impediments of family life and relations of generations and help to develop policies for the future.

Each person’s answer is very important to us, because each person who was visited and questioned represents a particular group of our society. Therefore, although they were randomly selected, the participants of this survey proportionally represent all of the inhabitants of this country. That is why it is important to question the same people again this time.

We will hold the information you give us in the strictest confidence, and use it only for statistical processing. If possible, it would be better if we could have this interview without others being present.

This survey is a continuation of the Survey of familial and intergenerational relationships in which you participated in Autumn 2005. It is part of a European programme of research on family. To improve understanding of demographic and familial evolutions, it is important that we could evaluate your situation today.

**Interviewer instruction: it is important to know the changes in the people's life between 2005 and 2008 to better understand their behaviour. For example, if a person wanted to have a child in 2005 but he/she broke up with his/her partner since, that can explain why he/she could not have the child he/she wanted to have.**
**Interviewer Instruction:** Write who else is present when the interview starts.

002. Other persons present at the start of interview

<table>
<thead>
<tr>
<th>Comment: Indicators filled out by the interviewer</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>At this moment of the interview, is the respondent in the presence of other people?</strong></td>
</tr>
<tr>
<td>1. yes</td>
</tr>
<tr>
<td>2. No</td>
</tr>
</tbody>
</table>

*If the answer = 1:* Indicate the person(s) currently present: *(3 possible answers)*

1. Partner
2. children, step-children, Grand-children
3. Parents or parents in law
4. Brother and/or sister
5. Friends
6. Do not know
### 1. HOUSEHOLD

**Respondent Check**

101. Sex of respondent.
   *Comment: answer retrieved from Wave 1*
   
   *Select M/F in Household Grid.*

102. Now I’d like to ask you a few questions about yourself. In what month and year were you born?
   *Comment: answer retrieved from Wave 1*
   
   *Write R’s month and year of birth and age in Household Grid.*

**Interviewer Check:**

*Check that the month and year of birth match with the data on the address card. See Address Card.*

   ```
   yes → go to 104 no → continue ↓
   ```

103. Were you interviewed by { National Institute } three years ago?
   1. yes ↓
   2. no → give up the interview!
   *Comment: true for all interviewees*

<table>
<thead>
<tr>
<th>Do you habitually live in an other independent housing?</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Yes</td>
</tr>
<tr>
<td>2. No</td>
</tr>
<tr>
<td>9. do not know</td>
</tr>
</tbody>
</table>

*If answer=1: How often do you go to this other housing?*

1. Every week, about half of the time
2. Every week, but less than half of the time
3. Less often (a few days a month)

<table>
<thead>
<tr>
<th>Are you?</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. French by birth, including by restoration of nationality?</td>
</tr>
<tr>
<td>2. French by naturalization, marriage, declaration or acquisition at age 18?</td>

</tbody>
</table>

*If answer = 3, 13 or 23 (foreigner) What is your nationality?*

*(Trigram coding with nationality table: authorize Do not know and Refusal)*
104. Which of the items on the card best describes what you are mainly doing at present?

**Show Card 104: Activity. Write answers in Household Grid.**

1. student, in school, in vocational training
2. employed
3. self-employed
4. helping family member in a family business or a farm
5. unemployed (registered or not at ANPE – National Agency for Employment)
6. retired (including retired from business and early retirement)
7. in military service or social service
8. homemaker
9. maternity leave
10. parental leave, care leave (full time)
11. ill or disabled for a long time or permanently
12. other

1501 - In apprenticeship or paid training
1502 - Employed or self-employed

**Other Household Member**

105. I would like to ask you about all persons who live in this household. Who are they? To help me keep track of your answers, please tell me their first names and how they are related to you.

Please also include children or stepchildren who live in your household in share custody (for example a week out of two)

**Household members: a definition specific to «ERFI»**

We let the respondent give the list of household members a priori without more explanations. However, if he/she hesitates, we will refer to the following definition: “A household is made of all persons who live under the same roof during at least 4 days in «regular» week and that for at least 3 months”. Take account of children younger than 3 months and of your partner if he just moved in or if you started living together for less than 3 months.

However, are included in the household:

1- dependent children in shared custody
2- other persons who mainly live at this address but work and study away from home and can not come back home every day.
3- person temporarily at hospital or in prison

Les personnes de passage dont le domicile principal est situé ailleurs qu'à l'adresse enquêtée ne sont pas incluses dans le ménage".
Show Card 105: Relationship to R. Write answers in Household Grid.

1. partner or spouse  
2. biological child with the current partner or spouse  
3. biological child with former partner or spouse  
4. stepchild  
5. adopted child  
6. foster child  
7. biological or adoptive parent  
8. stepparent or foster parent  
9. biological or adoptive parent or current partner or spouse  
10. stepparent or foster parent of current partner or spouse  
11. grand- or great-grandchild (either R's or partner's)  
12. grand- great-grandparent (either R's or partner's)  
13. brother or sister  
14. partner's or spouse's brother or sister  
15. other relative of R  
16. other relative of partner or spouse  
17. a non-relative

1501 - partner of a child of the respondent (son or daughter in-law)  
0  – R lives alone → go to 112

106. Are there any other household members who usually live here but are now away on business, at school, at boarding school, at university, in hospital or somewhere else?  
1. yes  
2. no → go to introductory text before 107

b. Please tell me their first names and how they are related to you.  
Write the names and relationships in Household Grid, tick mark in Column 'Temporarily Away'.

Now I would like to ask you a few questions about the people who live together with you in this household.

Interviewer Instruction: Ask 107 and 108 about each household member and write answers in the Household Grid.

107. Can I just check, that [name] is male/female?  
108. a. How old is he/she?  
   b. In what month and year was he/she born?
If the household member is a child younger than 18 that the respondent had with another partner or a child that the partner had with someone else than the respondent: In practice, besides holidays, does this child live in your dwelling?

1. Every day (or almost)
2. About half of the time (one out of 2 days, one out of 2 weeks etc.)
3. Less often

If the answer=3 (child living in the dwelling less than half of the time): How many days a month on average?
Interviewer instruction: 97 = «part of holidays, some weekends»

If the child does not live in the household every day: When he/she is not at your place, this child usually lives… (2 possible answers; only 1 and 2, 1 and 4 or 2 and 4 are possible in combination)

1. At his/her other parent’s place
2. In boarding school, college
3. In an independent dwelling
4. Other, Specify

If the child lives in the household every day or does not live at his/her other parent’s place: How often does this child see his/her other parent besides holidays?
0 = never, less than once a year
96 = parent deceased or unknown
97 = several times a day
Once a day: code 7 times a week

Interviewer Instruction: Ask 109 about each household member who is at least 14 years old. See Household Grid for the age.
109. Which of the items on the card best describes what [name] is mainly doing at present?

*Show Card 104 and write in Household Grid.*

1. student, in school, in vocational training
2. employed
3. self-employed
4. helping family member in a family business or a farm
5. unemployed (registered or not at ANPE – National Agency for Employment)
6. retired (including retired from business and early retirement)
7. in military service or social service
8. homemaker
9. maternity leave
10. parental leave, care leave (full time)
11. ill or disabled for a long time or permanently
12. other
1501 - In apprenticeship or paid training
1502 - Employed or self-employed
Interviewer Instruction: Ask 110 about each non-biological child in the household (codes 4–6 in relationship with R).

110. In what month and year did you and [name] first start living in the same household?  

*Write in Household Grid.*

<table>
<thead>
<tr>

<td>3. No</td>
<td></td>
</tr>
</tbody>
</table>
If the respondent have studied during the three last years, otherwise the answer was retrieved from Wave 1

112. What is the highest level of education you have successfully completed?

1501. 0 - isced97
1502. 1-2 - isced97
1503. 3A - isced97
1504. 3B - isced97
1505. 3C - isced97
1506. 5A-6 - isced97
1507. 5B - isced97

Show Card 112 [Country-specific list to be compatible with ISCED]

1. No diploma
2. Primary school diploma
3. Middle-school diploma
4. Lower vocational diploma
5. Vocational high-school diploma
6. General high-school diploma
7. Diploma equivalent to two years in higher education
8. Diploma equivalent to more than two years in higher education

if the answer = 4: Specify which lower vocational diploma you obtained:
1. CAP, CAPA, mention complémentaire au CAP
2. BEP, BEPA, mention complémentaire au BEP
3. Others diplomas of an equivalent level : brevet de compagnon, aide soignante, auxiliaire de vie, titre AFPA 1er degré…
4. CAP, BEP or diploma of this level without any further indication

if the answer = 5: Specify which vocational high-school diploma you obtained:
1. Brevet professionnel ou de technicien, BEA, BEC, BEI, BEH, BSEC
2. Baccalauréat professionnel
4. Baccalauréat technologique ou professionnel or diploma of this level without any further indication

if the answer = 7: Specify which diploma equivalent to two years in higher education you obtained:
1. University degree
2. BTS, DUT or equivalent
3. Health professional diploma equivalent to two years in higher education (nurse, etc)
4. Diploma equivalent to two years in higher education without any further indication

if the answer = 8: Specify which diploma equivalent to more than two years in higher education you obtained:
1. Post-graduate university degree
2. Degree from Engineering school or other "Grande Ecole"
3. PhD (including medicine, pharmacy, dentistry),
4. Diploma equivalent to more than two years in higher education without any further indication
If the respondent obtained at least one degree

113. What was the main subject matter of these studies?

   Write exact answer.

114. In what month and year did you reach that level? (When did you finish your studies?)

   month [___] year [___]

115. Have you ever worked for a period of at least 6 consecutive months?

   1. yes  2. no go to introductory text before 117

116. When did you start working at this first paid job or business?

   month [_____] year [___]

Dwelling Unit

Now I would like to ask you some questions about your accommodation.

In which year did you first live in a dwelling independent from your parents’ and not paid by them, i.e. a dwelling paid by yourself, your partner or your employer? “never: code 0”

Renting, colocation or ownership. Do not take account of military service, boarding school.

Interviewer Check:

Has R’s address changed between the waves? See Address Card.

   yes continue  no go to 118

Question asked to all respondents

117. In what month and year did you start living in this [type of accommodation]?

   month [_____] year [___]

118. How many rooms are there in the dwelling where you live, NOT counting kitchens, bathrooms and toilets? Exclude also rooms used solely for business, hallways and utility rooms.

   Number of rooms ________

119. Does your household own or rent this accommodation or does it come rent-free?

   1. owner
   2. tenant or subtenant, paying rent
   3. accommodation is provided rent-free
   4. other

   1501 – becoming an owner
If \(119 = 2 \text{ or } 3\): The dwelling owner is ?
1. The employer of a household member under a company housing agreement ?
2. A subsidized housing agency or association?
3. A government department, a social security agency or an association ?
4. A bank, insurance company, or other public or private sector company?
5. A family member ?
6. Another private person?
7. Other case
8. Do not know

120. How satisfied are you with your dwelling? On a scale from 0 to 10 where 0 means ‘not at all satisfied’ and 10 means ‘completely satisfied’ and 5 means ‘about average’, what number best represents your satisfaction with your dwelling? Please use this card and tell me the value on the scale.

*Show Card 120: Satisfaction Scale.*

Value from Satisfaction Scale __________

121. Do you intend to move within the next three years?
1. definitely not.......\(\rightarrow\) go to Interviewer Check before 201
2. probably not .........\(\rightarrow\) go to Interviewer Check before 201
3. probably yes.........\(\rightarrow\) continue with 122
4. definitely yes .........\(\rightarrow\) continue with 122

122. Would that be to another country, to another municipality or within the same municipality?
1. to another country
2. to another municipality
3. within the same municipality
4. within the country, but cannot say about municipality
2. CHILDREN

Childcare

Comment: Indicators filled out by the interviewer
At this moment of the interview, is the respondent in the presence of other people?
1. yes
2. No

If the answer = 1: Indicate the person(s) currently present: (3 possible answers)
1. Partner
2. children, step-children, Grand-children
3. Parents or parents in law
4. Brother and/or sister
5. Friends
6. Do not know

Interviewer Check:

Does R have any children younger than 14 in the household?
See Household Grid for codes 2–6 in ‘Relationship to R’ and ‘Age’<14.

yes → continue ↓ no → go to 206

201. Is there a partner in the household? See Household Grid.

   yes
   ↓

   Hand out Card 201-1
   [Comment: This card includes all alternatives from the table head]

   no
   ↓

   Hand out Card 201-2
   [Comment: This card does not include the partner-related alternatives]

If a partner or an adult aged 16 or older is present in the household

Start asking item by item from the table below.

If the answer is 6 “Always or usually other person in R’s household”, ask question 201b before proceeding to the next item.
b. Could you just tell me which of the other household member?

*Write the reference number of the household member from the Household Grid into the table below.*

205. How much does your household usually pay per month for childcare, if anything?
   Comment: costs were asked for each childcare arrangement. All cost were added to obtain total amount paid for childcare.
   ___________ € per W M Y
   0 – does not pay for childcare
If their is at least one child which is more than 16 years old? Do some of the children living with you have children of their own?

1. yes
2. No

If the answer =1: which one or ones?

Number(s) of child(ren) in the household roster

For each child: How frequently do you see the children of [child]?

Number of times (0 to 99)

0 = never
88 = the grand children live with the respondent
90 = only during the holidays
99 = do not need to be taken care of / too old

If frequency ≠ 0, 88, 90, 99: frequency (Per…)
W = Week, M = Month, Y = Year

How frequently do you look after the children of [Child(i)]?*

Number of times (0 to 99)

0 = never
88 = the grand children live with the respondent
90 = only during the holidays
99 = do not need to be taken care of / too old

If frequency ≠ 0, 88, 90, 99: frequency (Per…)
W = Week, M = Month, Y = Year

206. a. Over the last 12 months, have you given regular help with childcare to other people (children who do not belong to your household: children of friends, neighbours, brothers and sisters, grandchildren etc.)?

If it is R's job to provide childcare, consider only the help outside his/her job.

1. yes ↓
2. no → go to Interviewer Check before 207

**Non-Resident Children**

*Comment: questions about deceased children were asked later in the section*

| Interviewer Check: |  
|-------------------|-------------------|
| Does R have children in the household? |  
| yes → | 207. We already talked about those children who currently live in your household. In addition to them, have you given birth to/ fathered any other children or have you ever adopted any other children? Do not include stepchildren, that is, children belonging to your current or prior partner/spouse. I will ask you about those children later. |
| no → | 207. Have you given birth to/ fathered any children or have you ever adopted any children? Do not include stepchildren, that is, children belonging to your current or prior partner/spouse. I will ask you about those children later. |

1. yes → continue with 2. no → go to 221

208 ↓
**Interviewer Instruction:** First, fill in answers to 208 and 209 for all mentioned children, then continue by asking all the other questions about the first non-resident child, then about the second, and so on.

*If more than eight stepchildren, only the seven last born ones (youngest) and the oldest one were described*

*Go to 0 for the next child. If no more children continue...*
221. (In addition to the children we already talked about,) have you ever had any foster children?
   1. yes → go back to 208 and repeat the table for all foster children, using the word ‘foster-children’ instead of children. Code 3 at 211 without asking.
   2. no  ↓

Stepchildren

Interviewer Check: Does R live together with a partner? See Household Grid.
   yes → continue  ↓  no → go to 232

222. First, I would like to ask you, are you now living together with the same partner with whom you lived in [month year of first wave]?
   1. yes → go to 232
   2. no  ↓

223. Next, I would like to know about any stepchildren, that is, children your current partner/spouse has had, other than those who currently live in the household. Has your partner had children who do not currently live in your household? Please include any children who may have died.
   1. yes  ↓
   2. no → go to 232

Now I’d like to ask you a few questions about each of them, starting with the oldest.

If 223 = 1: How many? (Number from 1 to 8)

Interviewer Instruction: First, fill in answers to 224 and 225 for all mentioned children, then continue by asking all the other questions about the first stepchild, then about the second, and so on.
Comment: questions 224, 225 and 226 were asked when the partner was the same than in Wave 1

<table>

_____ times per: _____ W _____ M _____ Y
0 – does not help

237. a. Do you have any great-grandchildren?
1. yes ↓
2. no → go to Interviewer Check before 301

b. How many?
__________________
3. PARTNERSHIPS

Comment: In this section, the same questions were asked in the French questionnaire but the subsections were ordered differently. They are ordered similarly to Wave 1 questionnaire:
- Current Co-Resident Partner or Spouse
- Current Non-Resident Partner or Spouse
- Intentions of Union Formation
- Partnership History (between Wave 1 and Wave 2 not including current partner)

Partnership History

301. Did you live together with a partner in… month… year (first wave)?
Comment: answer retrieved from Wave 1
1. yes 2. no → go to 306

302. Were you married to this partner in … month… year (first wave)?
Comment: answer retrieved from Wave 1
1. yes → go to 305 2. no

[1501 - Pacte civil de solidarité (PACS) – civil union]

If 302=2 or 1501

303. Did you marry him/her afterwards? (we talk about civil wedding)
1. yes 2. no → go to 305

[1501 - civil union (PACS) afterwards]

If 303=2 or 1501

304. In which month and year?

month  |___|___|  year  |___|___|

If the respondent has a coresident partner: How did you meet each other?
1. At some friend’s place, neighbours’ place
2. In a nightclub
3. At a ball
4. At school, university
5. At work
6. At a family party
7. In a public place
8. During the holidays
9. At sport club, leisure activity, voluntary organization
10. Classified ads
11. Internet
12. Dating agency
13. Speed Dating, etc.
14. Other specify.

If the respondent has a coresident partner: When did this relationship start to become serious?
Indicate month
Indicate year
305. Are you now living together with the same partner/spouse with whom you lived in [month year of first wave]?
1. yes \(\rightarrow\) go to 323  
2. no \(\rightarrow\) go to 312

If the respondent has a coresident partner: Do you live together permanently or does one of you live part of the week or part of the year in another dwelling?
1. Together permanently  
2. Part of the week separately  
3. Part of the year separately  
4. Other. Specify.

If the partners do not live together permanently: Along the year, would you say you live with your partner about…
1. A quarter of the time  
2. Half of the time  
3. Three quarters of the time

If the partners do not live together permanently: Since when do you have this type of relationship?
- Indicate month  
- Indicate year

306. Have you lived together (as a couple) with a partner since …. month….year {first wave}?  
Comment: by living together as a couple, we mean living in the same dwelling during at least three months in a row.
1. yes \(\rightarrow\) continue ↓  
2. no \(\rightarrow\) go to 328

</table>
319. Did you live together with another partner afterwards?
   1. yes → go to 307 on the next partner ↑  2. no → continue with Interviewer
   Comment: limited to 3 partners

**Interviewer Check:**

   Did the R have a new partner in the last three years?

   yes → continue ↓  no → go to 323

320. As mentioned, our survey also deals with same-sex partnerships. May I ask you, have any of your partners in the last three years been of the same sex as you?
   Comment: the sex of the partner was asked at the beginning of the grid, just after the first name.

   1. yes ↓  2. no → go to 322

321. Which one(s)?

   Write reference numbers of same-sex partners from the table on the line below.

   _____________________
322. a. Was your partner/spouse born in [the UK]?
   1. yes → go to 323
   2. no ↓

   b. In which country was he/she born?
   Country of birth ________________________________________________

   c. In what month and year did he/she first start living permanently in [the UK]?
   month ______ year ______

Your partner is…
   1. French by birth, including by restoration of nationality ?
   2. French by naturalization, marriage, declaration or acquisition at age 18 ?
   3. Foreign ?
   4. Stateless ?
   13. Both French by birth, including by restoration of nationality, and foreign?
   23. Both French by naturalization, marriage, declaration or acquisition at age 18, and foreign?

   If the answer = 3, 13, 23 (foreigner): What is your partner’s nationality ?
   (Nationality, Do not know, Refused to answer)

323. What is the highest level of education your partner/spouse has successfully completed?
   [Country-specific list to be compatible with ISCED]

   1. No diploma
   2. Primary school diploma
   3. Middle-school diploma
   4. Lower vocational diploma
   5. Vocational high-school diploma
   6. General high-school diploma
   7. Diploma equivalent to two years in higher education
   8. Diploma equivalent to more than two years in higher education

   If answer = 1: What level did he/she reach?
   1. Didn't go to school
   2. Primary school
   3. Middle school
   4. Above middle school
   5. No diploma, without any further indication

   If answer = 4: Specify which lower vocational diploma he/she obtained:
   1. CAP, CAPA, mention complémentaire au CAP
   2. BEP, BEPA, mention complémentaire au BEP
   3. Others diplomas of an equivalent level : brevet de compagnon, aide soignante, auxiliaire de vie, titre AFPA 1er degré…
   4. CAP, BEP or diploma of this level without any further indication
If the answer = 5: Specify which vocational high-school diploma he/she obtained:
1. Brevet professionnel ou de technicien, BEA, BEC, BEI, BEH, BSEC
2. Baccalauréat professionnel
4. Baccalauréat technologique ou professionnel ou diploma of this level without any further indication

If the answer = 7: Specify which diploma equivalent to two years in higher education he/she obtained:
1. University degree
2. BTS, DUT or equivalent
3. Health professional diploma equivalent to two years in higher education (nurse, etc)
4. Diploma equivalent to two years in higher education without any further indication

If the answer = 8: Specify which diploma equivalent to more than two years in higher education he/she obtained:
1. Post-graduate university degree
2. Degree from Engineering school or other "Grande Ecole"
3. PhD (including medicine, pharmacy, dentistry)
4. Diploma equivalent to more than two years in higher education without any further indication

If the partner obtained at least one degree

324. What was the main subject matter of these studies?

Write exact answer.

Interviewer Check:

Is R currently living with a partner (see Household Grid)?

yes
↓
no
↓

Is R currently married to that partner (see Household Grid)?

yes
↓
no
↓
go to 401

Continued with 325

325. Do you intend to marry your partner during the next 3 years?

Comment: question asked also to respondents with a non-resident partner

1. definitely not
2. probably not
3. probably yes
4. definitely yes

Go to 401!
326. Do you intend to start living together with your partner during the next 3 years?
   1. definitely not
   2. probably not
   3. probably yes
   4. definitely yes

327. Do you intend to marry someone your partner during the next 3 years?
   1. definitely not
   2. probably not
   3. probably yes
   4. definitely yes

   [1501 - already married with my non-resident partner]
Current Non-Resident Partner or Spouse

328. Are you currently having an intimate (couple) relationship with someone you're not living with? (This may also be your spouse if he/she does not live together with you. Our survey does not only cover heterosexual relationships, but also same-sex relationships. If you have a partner of the same sex, please answer the following questions as well.)

1. yes ↓
2. no → go to 401

Would you define your relationship as…?
1. A couple relationship
2. A stable romantic relationship
(Do not know possible but not proposes)

How did you meet each other?
15. At some friends’ place, neighbors’ place
16. In a nightclub
17. At a ball
18. At school, university
19. At work
20. At a family party
21. In a public place
22. During the holidays
23. At sport club, leisure activity, voluntary organization
24. Classified ads
25. Internet
26. Dating agency
27. Speed Dating, etc.
28. Other specify.

Is it still the same partner than in October 2005 (wave 1)?
1. Yes
2. No

If not (presence of a nonresident partner in 2005 and current partner different from the one in wave 1): When did this relationship end up?
Indicate month
Indicate year (2005 to 2008, Do not know)

How did this relationship end up?
1. Break up
2. Partner died

329. In what month and year did this relationship start? (when did this relationship start to become serious?)
Comment: if same partner than in Wave 1, the answer is retrieved from Wave 1
month [_____] year [_____]
330. a. Are you living apart because you and/or your partner want to or because circumstances prevent you from living together? Please choose your answer from the card.

*Show Card 330a.*

1501 – other reasons, specify

1 – I want to live apart
   ↓
   b

2 – both my partner and I want to live apart
   ↓
   b → c

3 – my partner wants to live apart
   ↓
   c

4 – we are constrained by circumstances
   ↓
   d

b. Why do you (R) want to live apart? Please choose the most important reason.

1.

*Show Card 330b.*

1 – for financial reasons
2 – to keep independence
3 – because of children
4 – not yet ready for living together
5 – other

If 330a=2 continue with 330c
If 330a=1 continue with 331

b. Why does your partner want to live apart? Please choose the most important reason.

1.

*Show Card 330c.*

1 – for financial reasons
2 – to keep independence
3 – because of children
4 – not yet ready for living together
5 – other
6 – do not know
97 – do not know

If 330a=2 continue with 330c
If 330a=1 continue with 331

d. By which circumstances?

Please choose the most important circumstances.

*Show Card 330d.*

1 – work circumstances
2 – financial circumstances
3 – housing circumstances
4 – legal circumstances
5 – my partner has another family
6 – other (specify)

If 330a=2 continue with 330c
If 330a=1 continue with 331

331. Please tell me whether your partner is male or female.

*Comment: question asked after question 328*

1 – male
2 – female

If different sex partner and if the non-resident partner is not the same than in Wave 1 or if he/she is the same but the partners were not married in Wave 1: Are you married?

1. Yes
2. No

If not married or same-sex partner: Are you in a civil union (PACS)?

1. Yes
2. No
8. Refusal

If married: What was the date of your wedding?

We talk about civil wedding
Indicate month
Indicate year

If civil union: What was the date of your civil union (PACS)?

Indicate month
Indicate year
Interviewer Check: Is the partner of same sex as R?

yes \(\rightarrow\) go to 0  \hspace{1cm} no \(\rightarrow\) continue with 332

[Comment: Countries where it is possible to register a same sex partnership, should route same-sex partners into questions analogous to 332, using the appropriate terminology.]

332. Have you ever lived together with him/her (for at least three months)?
   1. yes
   2. no

From when to when? (if more than one period, indicate the latest)?
   From \(\underline{\underline{\text{(month / Year)}}}\) \(\underline{\underline{\text{(do not know)}}}\)
   To \(\underline{\underline{\text{(month / Year)}}}\) \(\underline{\underline{\text{(do not know)}}}\)

333. In what month and year was your partner/spouse born?
   
   Comment: if same partner than in Wave 1, the answer is retrieved from Wave 1
   month \(\underline{\underline{\text{|____|____|}}}\) year \(\underline{\underline{\text{|____|____|}}}\)

   If does not know: How old is your partner?

334. a. Was your partner/spouse born in [the UK]?
   1. yes \(\rightarrow\) go to 0  \hspace{1cm} 2. no

   b. In which country was he/she born?
   Country of birth ______________________________________________

   c. In what month and year did he/she first start living permanently in France [the UK]?
   month \(\underline{\underline{\text{|____|____|}}}\) year \(\underline{\underline{\text{|____|____|}}}\)

Your partner is...
   1. French by birth, including by restoration of nationality?
   2. French by naturalization, marriage, declaration or acquisition at age 18?
   3. Foreign?
   4. Stateless?
   13. Both French by birth, including by restoration of nationality, and foreign?
   23. Both French by naturalization, marriage, declaration or acquisition at age 18, and foreign?

   If the answer = 3, 13, 23 (foreigner): What is your partner’s nationality?
   (Nationality, Do not know, Refused to answer)

335. What is the highest level of education your partner/spouse has successfully completed?
   [Country-specific list to be compatible with ISCED]

   1501. 0 - isced97
   1502. 1-2 - isced97
   1503. 3A - isced97
   1504. 3B - isced97
   1505. 3C - isced97
   1506. 5A-6 - isced97
   1507. 5B - isced97
1. No diploma
2. Primary school diploma
3. Middle-school diploma
4. Lower vocational diploma
5. Vocational high-school diploma
6. General high-school diploma
7. Diploma equivalent to two years in higher education
8. Diploma equivalent to more than two years in higher education

If answer = 1: What level did he/she reach?
   1. Didn't go to school
   2. Primary school
   3. Middle school
   4. Above middle school
   5. No diploma, without any further indication

If answer = 4: Specify which lower vocational diploma he/she obtained:
   1. CAP, CAPA, mention complémentaire au CAP
   2. BEP, BEPA, mention complémentaire au BEP
   3. Others diplomas of an equivalent level: brevet de compagnon, aide soignante, auxiliaire de vie, titre AFPA 1er degré…
   4. CAP, BEP or diploma of this level without any further indication

If the answer = 5: Specify which vocational high-school diploma he/she obtained:
   1. Brevet professionnel ou de technicien, BEA, BEC, BEI, BEH, BSEC
   2. Baccalauréat professionnel
   4. Baccalauréat technologique ou professionnel or diploma of this level without any further indication

If the answer = 7: Specify which diploma equivalent to two years in higher education he/she obtained:
   1. University degree
   2. BTS, DUT or equivalent
   3. Health professional diploma equivalent to two years in higher education (nurse, etc)
   4. Diploma equivalent to two years in higher education without any further indication

If the answer = 8: Specify which diploma equivalent to more than two years in higher education he/she obtained:
   1. Post-graduate university degree
   2. Degree from Engineering school or other "Grande Ecole"
   3. PhD (including medicine, pharmacy, dentistry)
   4. Diploma equivalent to more than two years in higher education without any further indication
If the partner obtained at least one degree

336. What was the main subject matter of these studies?

*Write exact answer.*

337. Which of the items on the card best describes what he/she is mainly doing at present?

**Show Card 104: Activity**

1. student, in school, in vocational training
2. employed
3. self-employed
4. helping family member in a family business or a farm
5. unemployed (registered or not at ANPE – National Agency for Employment)
6. retired (including retired from business and early retirement)
7. in military service or social service
8. homemaker
9. maternity leave
10. parental leave, care leave (full time)
11. ill or disabled for a long time or permanently
12. other

1501 - In apprenticeship or paid training

338. How long does it take to get from your home to where he/she is living at present? (by the quickest mean of transport)

_____ hours _____ minutes

339. How often do you see him/her?

_____ times per: W M Y

Which of the items apply to your partner’s living arrangement? Only one answer possible (most frequently)

1. In a private dwelling excluding parental home
2. In a private dwelling in parental home
3. In a dwelling unit that specifically meets the needs of the elderly (service flat, semi-independent, sheltered accommodation)
4. In a home for the elderly
5. In a nursing home
6. In a workers’ hostel
7. In military barracks
8. Other type of accommodation, specify.

340. Is your partner/spouse limited in his/her ability to undertake normal everyday activities, because of a physical or mental health problem or a disability?

1. yes  2. no

Do you intend to live with your partner during the next 3 years?

1. No
2. No, probably not
3. Yes, probably
4. Yes
5. Is not concerned
6. Does not know
341. Does your partner think that you should start living together?
   1. yes
   2. no
   3. partner is not sure
   97– R does not know

<table>
<thead>
<tr>
<th>If the respondent is not married neither in civil union and does not intend to marry: Do you intend to get in civil union (PACS) during the next 3 years?</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. No</td>
</tr>
<tr>
<td>2. No, probably not</td>
</tr>
<tr>
<td>3. Yes, probably</td>
</tr>
<tr>
<td>4. Yes</td>
</tr>
<tr>
<td>7. Refusal</td>
</tr>
<tr>

</tr>
</tbody>
</table>
4. HOUSEHOLD ORGANISATION AND PARTNERSHIP QUALITY

Comment: Indicators filled out by the interviewer
At this moment of the interview, is the respondent in the presence of other people?
1. yes
2. No

If the answer = 1: Indicate the person(s) currently present: (3 possible answers)
1. Partner
2. children, step-children, Grand-children
3. Parents or parents in law
4. Brother and/or sister
5. Friends
6. Do not know

Household Organisation

If the respondent has a coresident partner

401. Now I would like to ask you some questions about who does what in your household. Please tell me who does the following tasks in your household, choosing your answers from the card.

Interviewer Check: Look at the Household Grid.

\[
\begin{align*}
R \text{ lives alone} & \quad R \text{ does not live alone} \\
\downarrow & \quad \downarrow \\
\text{Show Card 401-1} & \quad \text{There is a partner in the household} \\
[\text{Comment: This card includes the alternatives 1, 2 and 7 where the 7 is 'always or usually someone else')} & \quad \downarrow \\
\text{Show Card 401-2} & \quad \text{There is no partner in the household} \\
[\text{Comment: This card includes all alternatives from the table head}] & \quad \downarrow \\
\text{Show Card 401-3} & \quad [\text{Comment: This card does not include the partner-related alternatives}]
\end{align*}
\]

Start asking item by item from the table below.

If the answer is 6 “Always or usually other person in R’s household”, ask question 401b before proceeding to the next item.

b. Could you just tell me which of the other household member?

Write the reference number of the household member from the Household Grid into the table below.
<table>
<thead>
<tr>
<th></th>
<th>always R</th>
<th>usually R</th>
<th>R and P about equally</th>
<th>usually P</th>
<th>always P</th>

**Interviewer Check: Look at the Household Grid.**

- **R lives alone**
  - Ask 403 and 404 using the word ‘you’ instead of ‘your household’
  - go to 403

- **R does not live alone**
  - There is a partner in the household
  - continue
  - go to 403

402. How satisfied are you with the division of household tasks between you and your partner/spouse? Please use this card and tell me the value on the scale.

**Show Card 120: Satisfaction Scale.**

Value from Satisfaction Scale: ____________

Do you get regular and free help with household tasks?
If the person who helps is paid, do not consider that this help is free
1. Yes
2. No

**If someone give free and regular help with household tasks (answer yes to the previous question)**

403. Which people give your household regular help with household tasks?

**Comment: limited to 2 answers**

**Code using the List of Providers and Receivers.**
404. Does your household regularly pay someone to do housework?
   Comment: including people who is not paid by the household but by a mutual insurance company
   of a household member for example
   1. yes 2. no

**Decision-Making**

**Interviewer Check:**

```
Does R’s partner live in the household?
yes → continue
no ↓

Does R have a non-resident partner?
See 328
yes → go to 407
no → go to 501
```

405. We have already talked about the various tasks that have to be done in a household. Now I would
like to ask you some questions about decisions. Who makes decisions about the following issues
in your household?

*Show Card 401-2 and start asking item by item from the table below.*

*If the answer is 6 “Always or usually another person in R’s household”, ask question 405b before proceeding to the next item.*

b. Could you just tell me which of the other household member?

*Write the reference number of the household member from the Household Grid into the table below.*

</tbody>
</table>

410. Even the people who get along well with their partners sometimes wonder whether their marriage or partnership will work. Over the past 12 months, have you thought about breaking up your relationship?

*Comment: asked after question 407 and not asked if someone else is in the room*

1. yes
2. no

1501 – question not asked because someone else is in the room
### 5. PARENTS AND PARENTAL HOME

*Comment: this section was asked after the fecundity section*

The sections were separated differently in the French Questionnaire but the same questions were asked.

*Comment: In this part, separate parallel sections are printed for Rs at different life situation. According to the routing, one R gets questions from one parallel section only.*

#### Co-Residence with Biological Parents

Now I would like to ask you some questions about your parents and your parental home.

501. At the beginning of our interview when we were talking about your household you mentioned that you are …

*Look up from Household Grid.*

1. living with both of your parents \(\Rightarrow\) continue with 502
2. living with your father (not your mother) \(\Rightarrow go to 503\)
3. living with your mother (not your father) \(\Rightarrow go to 504\)
4. not living with your parents \(\Rightarrow go to 507\)

Is this correct?

502. Are both the parents who are living in this household your biological parents?

1. yes, both \(\Rightarrow go to 542\)
2. no, only my father \(\Rightarrow go to 505\)
3. no, only my mother \(\Rightarrow go to 506\)
4. no, both are adoptive, foster or step-parents \(\Rightarrow go to 507\)

503. Is your father who is living in this household your biological father?

1. yes \(\Rightarrow go to 505\)
2. no \(\Rightarrow go to 507\)

504. Is your mother who is living in this household your biological mother?

1. yes \(\Rightarrow go to 506\)
2. no \(\Rightarrow go to 507\)

505. May I ask you whether your biological mother is still alive?

*Comment: if the mother deceased before Wave 1, the answer was retrieved from Wave 1.*

1. yes \(\Rightarrow go to 509\)
2. no, not alive any more \(\Rightarrow go to 542\)
3. I do not know whether she still is alive \(\Rightarrow go to 542\)
4. I do not know anything about my biological mother \(\Rightarrow go to 542\)

*If 505=2:* When did she die?

- Indicate month
- Indicate year

506. May I ask you whether your biological father is still alive?

*Comment: if the father deceased before Wave 1, the answer was retrieved from Wave 1.*

1. yes \(\Rightarrow go to 515\)
2. no, not alive any more \(\Rightarrow go to 542\)
3. I do not know whether he still is alive \(\Rightarrow go to 542\)
4. I do not know anything about my biological father \(\Rightarrow go to 542\)

*If 506=2:* When did he die?

- Indicate month
- Indicate year
507. May I ask you whether your biological parents are still alive?

Comment: If the parents deceased before Wave 1, the answer was retrieved from Wave 1.

1. Yes, both are alive ................................................... → continue with 508
2. No, only mother is alive ........................................... → go to 509
3. No, only father is alive .......................................... → go to 515
4. No, neither mother nor father is alive .................... → go to 542
5. I do not know anything about my biological parents → go to 542

If 507=2,3,4: When did he/she die?
Indicate the month
Indicate the year

If the respondent does not live with his/her parents

508. Are your father and mother still living together? (Did your parents break up over the course of the 3 last years?)

Comment: If the parents were separated at the time of Wave 1, the answer is retrieved from Wave 1.

1. yes ................................................................. → go to 521
2. no ....................................................................... → go to 530

If the parents broke up between Wave 1 and Wave 2: When did that happened?
Indicate the year (2005 to 2008, do not know)

Questions about Biological Mother

509. Which of the items on this card apply to your mother's living arrangement? Please mention all categories that apply.

Show Card 509: Mother’s Living Arrangement.

Code all answers that apply.

1. alone
2. with her partner/spouse
3. with her son(s)
4. with her daughter(s)
5. with a relative
6. with a friend
7. in a room of a boarding house
8. in a dwelling that specifically meets the needs of the elderly (like a service flat, semi-independent sheltered accommodation)
9. in a home for the elderly
10. in a nursing home
1501. another type of housing

510. Is your mother limited in her ability to carry out normal everyday activities because of a physical or mental health problem or a disability?

1. yes
2. no

511. How long does it take to get from your home to where your mother is living at present?

_____ hours _____ minutes

512. How often do you see your mother?

_____ times per: W M Y
0 – never

1501. several times a day
513. How satisfied are you with the relationship with your mother? Please use this card and tell me the value on the scale.

*Show Card 120: Satisfaction Scale.*

Value from Satisfaction Scale: ____________

514. Do you intend to start living together with your mother within the next 3 years?

1. definitely not
2. probably not
3. probably yes
4. definitely yes

*Go to 542*

**Questions about Biological Father**

515. Which of the items on this card apply to your father's living arrangement? Please mention all categories that apply.

*Show Card 515: Father's Living Arrangement.*

**Code all answers that apply.**

1. alone
2. with his partner/spouse
3. with his son(s)
4. with his daughter(s)
5. with a relative
6. with a friend
7. in a room of a boarding house
8. in a dwelling that specifically meets the needs of the elderly (like a service flat, semi-independent sheltered accommodation)
9. in a home for the elderly
10. in a nursing home
1501. another type of housing

516. Is your father limited in his ability to carry out normal everyday activities because of a physical or mental health problem or a disability?

1. yes
2. no

517. How long does it take to get from your home to where your father is living at present?

_____ hours _____ minutes

518. How often do you see your father?

_____ times per: W M Y

0 – never
1501. several times a day

519. How satisfied are you with the relationship with your father? Please use this card and tell me the value on the scale.

*Show Card 120: Satisfaction Scale.*

Value from Satisfaction Scale: ____________

520. Do you intend to start living together with your father within the next 3 years?

1. definitely not
2. probably not
3. probably yes
4. definitely yes

540. How satisfied are you with the relationship with your father? Please use this card and tell me the value on the scale.

*Show Card 120: Satisfaction Scale.*

Value from Satisfaction Scale: ____________

541. Do you intend to start living together with your father within the next 3 years?

1. definitely not
2. probably not
3. probably yes
4. definitely yes
Brothers, Sisters, Grandparents

How many brothers did you have?  
Including deceased and stepbrothers

How many sisters did you have?  
Including deceased and stepsister

If the respondent had at least a brother or a sister

542. How many of your brothers and sisters are alive?  
______ brothers ______ sisters

If the respondent is younger than 60 and if at least one of the grandparents was alive at the time of Wave 1.

543. How many of your grandparents are alive?  
Comment: separated in 2 questions “how many of your maternal grandparents are alive?, how many of your paternal grandparents are alive?”

___________________

Start Living Separately from Parents

Interviewer Check: Does R currently live with at least one parent? See for codes 7 and 8 in the Household Grid.

yes → go to 545  no → continue  ↓

If the respondents was living with his/her biological or adoptive parents at the time of Wave 1 but no longer now (check household grid)

544. In what month and year did you for the first time start living separately from your parents for at least three months?  
Comment: answer retrieved from Wave 1 for respondents who were leaving separately from their parents at the time of Wave 1.

month [_____] year [____]  

If 544 = do not know: At what age did you approximately stop living with your parents?

Which reasons lead you to leave the parental home?  
2 possible answers maximum, but do not suggest straightaway to the respondent

1. To study
2. To work
3. To live with your partner
4. Your relationship with your parents was tensed
5. You wanted to live independently
6. Other, specify

Go to Interviewer Check before 601
If the respondent never lived separately from his/her parents at the time of wave 1

545. a. (over the course of the 3 last years) Have you ever lived separately from your parents for at least three months?
   Comment: answer retrieved from wave 1 for respondents who had already lived separately of their parents at the time of Wave 1.
   1. yes ↓
   2. no → go to 546

   b. In what month and year did that happen for the first time?
   month |___|___ |
   year |___|___ |

   If 545 = do not know: At what age did you first live separately from your parents for at least three months?

546. Do you intend to start living separately from your parents within the next 3 years?
   1. definitely not
   2. probably not
   3. probably yes
   4. definitely yes
   1501 – this is my parents who live with me

Interviewer Check:

   Does R have either a co-resident partner (see Household Grid) or a non-resident partner (see 328)?
   yes → continue ↓
   no → go to 601

547. Does your partner/spouse think that you should start living separately from your parents?
   1. yes
   2. no
   3. partner is not sure
   97– R does not know
6. FERTILITY

Note: The scheme below is designed to skip questions on current pregnancy and fecundity for female Rs 50 or older and male Rs with partners 50 or older and for Rs who have never had sexual intercourse with a person of the opposite sex.

Interviewer Check: Current partner is of same sex → go to 624

Interviewer Check: See Household Grid for R’s age

<table>
<thead>
<tr>
<th>R is a woman who is 50 or older</th>
<th>R is a woman who is younger than 50</th>
<th>R is a man</th>
</tr>
</thead>
<tbody>
<tr>
<td>→ go to 624</td>
<td>Does R currently have or previously ever had a co-resident partner? See Household Grid and 301. yes → go to 602 no → Hand out Card 0f and continue</td>
<td>Does R currently have either a co-resident (see Household Grid) or non-resident partner (see ) who is 50 or older? yes → go to 624 no → Hand out Card 601m and continue</td>
</tr>
</tbody>
</table>

The fertility section was not asked to male respondents aged 50 or older who do not have a partner (except the question about adoption)

601. Please answer yes or no to the question on this card.

[Comment: Card 601f has the question “Have you ever had sexual intercourse with a man?” Card 601m has the question “Have you ever had sexual intercourse with a woman?” Both cards also display answer categories 1 – yes, 2 – no.]

1. yes → continue with 602
2. no → go to 618

Current Pregnancy

Ask from women: → 602. I now would like to continue with some questions on pregnancies and having children. Are you currently pregnant?

Ask from men who have a female partner, either co-resident, see Household Grid, or non-resident, see 328: → 602. I now would like to continue with some questions on pregnancies and having children. Is your partner/spouse currently pregnant?

Ask from men without a partner: → 602. I now would like to continue with some questions on pregnancies and having children. Do you know of any woman who is currently pregnant by you?

Interviewer Instruction:
If the answer “yes” is obtained from a man without a partner, use “she” instead of “partner” or “spouse” in the questions on current pregnancy.

1 – yes ............................................ → continue with 603
2 – no ............................................ → go to 611
3 – maybe, do not know yet............ → go to 611

83
603. In what month and year is the child expected to be born?
   month [___] year [___]

604. Just before this pregnancy began, did you yourself want to have a/another baby at some time?
   1. yes ............................................ → continue with 605
   2. no ............................................ → go to 606
   3. not sure ..................................... → continue with 605

605. Did this pregnancy occur sooner than you wanted, later than you wanted, or at about the right time?
   1. sooner
   2. later
   3. about the right time

606. Couples do not always have the same feelings about the number or timing of children. Just before this pregnancy began, did your partner/spouse want to have a/another baby?
   1. yes
   2. no
   3. partner was not sure
   97 – R does not know

Interviewer Check: Look at the answers to 604 and 606.

Answer to both 604 and 606 is ‘2 – no’ ...... → go to 609

Any other combination of answers .......... → continue with 607

607. Did you or your partner/spouse do any of the things listed on this card to help you (your partner/spouse) get pregnant? Please name all of the things you did.
Comment: Limited to 4 answers

   Show Card 607: Infertility Treatment.
   1. receiving medication
   2. methods for ascertaining timing of ovulation
   3. in vitro fertilisation (IVF) or micro-fertilisation (ICSI)
   4. surgery
   5. artificial insemination (separated in 2 items: with partner’s sperm / with donor’s sperm)
   6. other medical treatment
   0 – did not use or do anything (not on the card) → go to 609

   → continue with 608

608. In what month and year did you first start doing something to help you (your partner/spouse) get pregnant this time?
   month [___] year [___]

   Go to 623
Did you or your partner/spouse use or do any of the things listed on this card to prevent pregnancy at the time it occurred? Please name all of the things you used or did.

**Show Card 609: Contraception**

[Comment: Country-specific list that should cover the range of available methods with commonly understandable labels in a country]

1. condom
2. pills
3. intra-uterine device (coil, loop)
4. diaphragm/cervical cap
5. foam/cream/jelly/suppository
6. injectables (e.g. Depo-Provera)
7. implants (e.g. Norplant)
8. Persona
9. hormonal emergency contraception afterwards ("morning-after pill")
10. withdrawal
11. safe period method (rhythm)
12. other

→ go to 623

In what month and year did you last use or do anything to prevent pregnancy?

Month |___|___|
Year |___|___|

0 = never used or did anything

Before this pregnancy, did you or your partner use one of the following contraceptive methods?

1. Yes
2. No
3. You never did anything to prevent pregnancy.
4. Pregnancy occurred while you or your partner were using contraception.
5. Refusal

**If answer=1,4:** please indicate all the things you used

1. Condom
2. pills
3. intra-uterine device (coil, loop)
4. diaphragm/cervical cap
5. foam/cream/jelly/suppository
6. injectables (e.g. Depo-Provera)
7. implants (e.g. Norplant)
8. Persona
9. hormonal emergency contraception afterwards ("morning-after pill")
10. withdrawal
11. safe period method (rhythm)
12. other

→ go to 623
### Fecundity

**Reminder:** The fertility section was not asked to male respondents aged 50 or older who do not have a partner (except the question about adoption).

#### 611. Do you yourself want to have a/another baby now?
- 1. **yes**
- 2. **no**
- 3. **not sure**

#### Are you currently trying to have a child?
- 1. **Yes**
- 2. **No**
- 3. Can not have children anymore (sterility, sterilisation)

  **If answer=1** How long have you been trying?
  - Number of years
  - Number of months

  **If answer<>1** During the 3 last years, did you try to have a child with your partner without managing?
  - 1. **yes**
  - 2. **no**
  - 8. refusal
  - 9. do not know

  **If answer=1** When you gave up (your partner gave up if the respondent is a man) trying to become pregnant, how long had you been trying?
  (If this happened several times, give the longest period)
  - Number of years (0 to 20, Do not know)
  - Number of month (0 to 99, Do not know)

#### 612. Some people are not physically able to have children. As far as you know, is it physically possible for you, yourself, to have a/another baby?
- 1. **definitely not**
- 2. **probably not**
- 3. **probably yes**
- 4. **definitely yes**
- 97. **do not know**

#### 613. Have you ever done any of the things listed on this card to help you (your partner/spouse) get pregnant? Please name all of the things you have done or are doing.

**Show Card 607: Infertility Treatment.**

1. receiving medication
2. methods for ascertaining timing of ovulation
3. in vitro fertilisation (IVF) or micro-fertilisation (ICSI)
4. surgery
5. artificial insemination
6. other medical treatment
7. did not use or do anything (not on the card)

**Comment:** The question 613 was asked but the filter was too different from the core questionnaire to be comparable with harmonized data (the question was asked only to respondents who are currently trying to have a child or have tried during the last 3 years).
Interviewer Check: Does R currently have either a co-resident partner (see Household Grid) or a non-resident partner (see 328)?

yes → continue no → go to 618

614. Couples do not always have the same feelings about the number or timing of children. Does your partner/spouse want to have a/another baby now (or later)?

1. yes
   1501. yes, now
   1502. yes, but later
2. no
3. partner is not sure
97– R does not know

615. Do you think it would be physically possible for your current partner/spouse to have a child of his/her own if he/she wanted to?

1. definitely not
2. probably not
3. probably yes
4. definitely yes
97– do not know

Interviewer Check: Look at answers to 612 and 615.

Answer to either 612 or 615 is ‘1 – definitely not’ ... → go to 619

No such answer given................................................... → continue with 616

616. Are you or your partner/spouse using or doing any of the things listed on this card to prevent pregnancy at this time? Please name all of the things you use or do. Limited to 4 answers

Show Card 609: Contraception

[Comment: Country-specific list that should cover the range of available methods with commonly understandable labels in a country]

1. condom
2. pills
3. intra-uterine device (coil, loop)
4. diaphragm/ cervical cap
5. foam/ cream/ jelly/ suppository
6. injectables (e.g. Depo-Provera)
7. implants (e.g. Norplant)
8. Persona
9. hormonal emergency contraception afterwards ("morning-after pill")
10. withdrawal
11. safe period method (rhythm)
1501: other

0 – did not use or do anything (not on the card) → continue with 617

617. In what month and year did you last use or do anything to prevent pregnancy?

month _____ year _____

0 – never used or did anything

If the respondent had at least a child between wave 1 and wave 2 (child born after wave 1, including respondents who were expecting a child at the time of wave 1), Previously, you told me you had [number of children] since Wave 1, Could you tell me for each of them if you wanted them to be born...

1. at that time of your relationship
2. later
3. sooner
4. not at all
5. you did not think about it
6. do not know
Intentions to Have Children

Reminder: the fertility section was not asked to male respondents aged 50 or older who do not have a partner (except the question about adoption)

Comment: This subsection was also asked to pregnant respondents pregnant (or whose partner is pregnant for men).

618. Do you intend to have a/another child during the next three years?
   1. definitely not
   2. probably not
   3. probably yes
   4. definitely yes

619. Do you intend to adopt a child or apply for adoption or take a foster child during the next three years (or do you have an on-going application)?
   1. definitely not
   2. probably not
   3. probably yes
   4. definitely yes

Interviewer check: Did R answer 3 or 4 to either of the previous two questions?
   yes → go to 621    no → continue

620. Supposing you do not have a/another child during the next three years, do you intend to have any (more) children at all?
   1. definitely not → go to 701
   2. probably not → go to 622
   3. probably yes → continue with 621
   4. definitely yes → continue with 621

621. Would you prefer your first/next child to be a boy or a girl?
   1. boy
   2. girl
   3. it does not matter

622. How many (more) children in total do you intend to have?
   _______ children

Go to 701

Note: Only pregnant women, and men with a pregnant partner arrive at the next question.

623. Not counting your current pregnancy, how many more children in total do you intend to have?
   _______ children

Go to 701

624. Do you intend to adopt a child or apply for adoption or take a foster child during the next three years (or do you have an on-going application)?
   1. definitely not
   2. probably not
   3. probably yes
   4. definitely yes
7.  HEALTH AND WELL-BEING

Health in General

701. How is your health in general?
1. very good
2. good
3. fair
4. bad
5. very bad

Interviewer Check:

Is the R older than 53 years?
yes → continue
no → Go to 710

702. a. Do you have any long-standing illness or chronic condition?
1. yes ↓
2. no → go to 703

b. How long have you had this long-standing illness or chronic condition?
1. less than 6 months
2. 6 months to one year
3. 1 year to 3 years
4. 3 years or more

703. a. Are you limited in your ability to carry out normal everyday activities, because of a physical or mental health problem or a disability?
1. yes ↓
2. no → go to 704

b. Since how long?
1. less than 6 months
2. 6 months to one year
3. 1 year to 3 years
4. 3 years or more

Personal Care

704. Do you need regular help with personal care such as eating, getting up, dressing, bathing, or using toilets?
1. yes ↓
2. no → go to 710

705. Over the last 12 months, have you received regular help with personal care from professional persons from the public sector or from a private organisation?

Answers 1 and 2 may both apply.
1. yes, from the public sector
2. yes, from a private organisation
3. yes, but do not know type of organisation
4. no
706. Over the last 12 months, have you (also) received such help from other people for whom providing such care is not a job?

1. yes ↓

2. no → go to 710

<table>
<thead>
<tr>
<th>Persons who helped R</th>

# 8. Activity and Education History

Now, we are going to talk about your work and studies since your 16th birthday. We are only interested in activities that lasted at least 3 months. Please choose from the activities on the card. If more than one activity applies to a certain period of time, for example, you were working and studying at the same time, please choose the activity in which you spent most time!

Which of the items on the card best describes what you were mainly doing at age 16?

<table>
<thead>
<tr>
<th>Spell</th>
<th>First Status</th>
<th>Spell 2</th>
<th>Spell 3</th>
<th>Spell 4</th>
<th>Spell 5</th>
<th>Spell 6</th>
<th>Spell 7</th>
<th>Spell 8</th>
</tr>
</thead>
<tbody>
<tr>
<td>801.</td>
<td>Which of the items on the card best describes what you were mainly doing next?</td>
<td>Value from Card 104</td>
<td>1501 - maternity leave or parental leave</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**From which age to which age?**

802. When did this period of [activity] start? month … year …

803. When did this period of [activity] end? month … year …

*If currently exist, code actual date!

**Interviewer Check:**
- If R was employed (see 801, code 2-5) go to 805;
- If R was student (see 801, code 1) continue 804;
- Other status: go to next spell (801)!
- If you have reached the time of the interview, go to Erreur ! Source du renvoi introuvable.!
804. Which type of diploma or degree did you receive with these studies (highest degree)?

Value from Card 112 [Country-specific list to be compatible with ISCED]

1501. 0 - isced97
1502. 1-2 - isced97
1503. 3A - isced97
1504. 3B - isced97
1505. 3C - isced97
1506. 5A-6 - isced97
1507. 5B - isced97

**Interviewer: go to 801 on the next spell!**

805. Was it full time or part time?

1 – full time during the whole period → go to 801
2 – part-time during the whole period → go to 801
3 – both (it has changed meanwhile) → continue

**Please list the periods when you were working part-time. [The interviewer should read this to R, so it is a question, not an interviewer instruction, and should be formatted accordingly.]**
<table>

Questions to Those Who Did Not Declare Working

927. Did you do any paid work in the 7 days ending last Sunday, either as an employee or self-employed?
1. yes  ↓  2. no → go to 957
Questions to Those Who Are Working

I would now like to ask a few questions about your current job or business. If you are engaged in two or more jobs or businesses, I would like you to tell me now only about the one in which you spend most of your working hours.

Are you?
1. Central government employee
2. Employee of local government, public housing or hospital services
3. Employee of a company, an artisan, an association
4. Employed by a private person
5. Unpaid helping family member
6. Business owner, employee, managing director, manager with minority holding, associate
7. Self-employed

929. What is your current occupation? Please describe the principal activity you perform.
(If the respondent helps a family member, which is the principal activity of the person you help?)

(Code: ISCO)

What is your job type?
1. Apprentice under contract
2. Temping agency placement
3. Paid work placement
4. Subsidized job
5. Other fixed-term, temporary or seasonal contract
6. Full-time open-ended contract, tenured civil servant
7. Part-time open-ended contract, tenured civil servant

What is your principal occupation?
If employee of local government, public housing or hospital services: answer may be 1, 2, 3, 4, 6, or 8. If private sector employee: answer may be 1, 2, 3, 5, 7, 9 or 10
1. Manual worker
2. Semi-skilled or skilled worker, workshop technician
3. Technician
4. Category B civil public sector employee
5. Mid-level administrative, commercial or sales employee
6. Category A public sector employee
7. Engineer, senior manager (excluding managing directors and direct assistants)
8. Category C or D public sector employee
9. Clerical, service or sales worker
10. Managing director or direct assistant
99. Do not know

In your job, what is your main function?
1. Production, construction, operation
2. Installation, repair, maintenance
3. Caretaking, cleaning, upkeep
4. Handling, warehousing, logistics
5. Secretarial duties, typing, reception
6. Management, accounting
7. Sales, sales engineer
8. Research and development, methods
9. Teaching
10. Personal care
11. Other function
930. In what month and year did you start this job or business?

month [___] year [___]

**Do you work full time or part time?**
1. Full time
2. Part time

*If the answer=2 Why do you work part time?*
1. You are in part-time parental leave
2. You could not find a full time job
3. Your part time working is imposed by your employer
4. You are not in parental leave part time but you want to conciliate professional life and personal life
5. For medical reasons
6. To have more time for yourself
7. For another reason: specify
8. Do not know

931. How many hours per week do you normally work in this job or business including overtime? 
____________ hours per week

932. Which of the following statements best describes where you work?
1. I usually work in one place away from home
2. I usually work at home
3. I usually work part of the week at home and part away from home
4. I usually work in a variety of places away from home

*If the respondent does not work at home (932=1,2,4): How long does it take to go from your home to your work place? (with the transport mean you use most frequently)*
Number of hours
Number of minutes

933. When do you usually work at this job? Please choose your answer from the card.
*Comment: French specificity, up to 4 answers (4 variables)*

**Show Card 933: Work Schedule.**

Regularly:
1. during the daytime
2. in the evening
3. at night
4. early in the morning
5. over the weekend
6. the working hours change periodically
7. two or more working periods each working day

Irregularly:
8. work on call
9. irregular working times
10. some other arrangement of working time

934. Are you …
1. a paid employee, ................................................................. → continue with 935

11. own illness or disability
12. wanted to retire or to live off private means
13. other reason
1501. retirement anticipated imposed by the employer

Questions to Those Who Did Not Declare Partner Working

1020. Did your partner/spouse do any paid work in the 7 days ending last Sunday, either as an employee or self-employed?
↓ yes ↓
2. no → go to 1036
Questions to Those Whose Partner Is Working

I would now like to ask a few questions about your partner’s/spouse’s current job or business. If he/she is engaged in two or more jobs or businesses, I would like you to tell me now only about the one in which he/she spends most of his/her working hours.

**Your partner is?**
1. Central government employee
2. Employee of local government, public housing or hospital services
3. Employee of a company, an artisan, an association
4. Employed by a private person
5. Unpaid helping family member
6. Business owner, employee, managing director, manager with minority holding, associate
7. Self-employed
97. do not know about partner’s work

1021. What is your partner’s/spouse’s current occupation? Please describe the principal activity he/she performs.

*(If the partner helps a family member, which is the principal activity of the person you help?)*

__(Code: ISCO)__
97 – do not know about partner’s work → go to 1036

**If the partner is employed:** What is your partner’s type of job?
1. Apprentice under contract
2. Temping agency placement
3. Paid work placement
4. Subsidized job
5. Other fixed-term, temporary or seasonal contract
6. Full-time open-ended contract, tenured civil servant
7. Part-time open-ended contract, tenured civil servant

**If the partner is self-employed or helps a family member:** How many people does your partner employ? How many people does the person he/she helps employ?
1. None
2. Less than 10
3. 10 or more
9. Does not know

**If the partner is self-employed or helps a family member:** What is the activity of the enterprise run by your partner? What is the activity of the enterprise run by the person he/she helps?

**For those who report their partners being farmers:** What is the size of your partner’s farm (in hectares .a.u.)? What is the size of the farm of the person he/she helps (in hectares .a.u.)?

In ha ……..

If size < 5 ha: What is the exact size in ares?
In ares……………..
**For those who report their partners being farmers:** What type of farm is it?
1. Polyculture (cultivation of ploughed land)
2. Market gardening or horticulture
3. Vineyards or orchards
4. Herbivorous livestock (cattle, sheep,...)
5. Granivorous livestock (poultry, pigs,...)
6. Polyculture – livestock
7. Herbivorous and granivorous livestock
8. Other

**If the partner helps a family member:** Does your partner do secretarial, sales or accounting work?
1. Yes
2. No

1022. Is your partner’s/spouse’s work or business full-time or part-time?
1. full-time
2. part-time

**If 1022 = 2:** Why does he/she work part-time?
1. He/she is in part-time parental leave
2. He/she could not find a full time job
3. His/her part time working is imposed by your employer
4. He/she is not in parental leave part time but you want to conciliate professional life and personal life
5. For medical reasons
6. To have more time for himself/herself
7. For another reason: specify
8. Do not know

1023. How many hours per week does your partner/spouse normally work in this job or business including overtime?
____________________

1024. Which of the following statements best describes where your partner/spouse works?
1. he/she usually works in one place away from home
2. he/she usually works at home
3. he/she usually works part of the week at home and part in one place away from home
4. he/she usually works in a variety of places

**If 1024=3, 4** How long does it take your partner to get from your house to the place he work (by the means of transport you use most often) ?
Number of hours
Number of minutes
1025. When does your partner/spouse usually work at this job? Please choose your answer from the card.
Comment: French specificity, up to 4 answers (4 variables)

**Show Card 933: Work Schedule.**

Regularly:
1. during the daytime
2. in the evening
3. at night
4. early in the morning
5. over the weekend
6. the working hours change periodically
7. two or more working periods each working day irregularly:
8. work on call
9. irregular working times
10. some other arrangement of working time

1026. Is your partner/spouse ...

1. a paid employee, .......................................................... → continue with 1027
2. self-employed, .......................................................... → go to 1031
3. in employment-related training or paid apprenticeship, or . → continue with 1027
4. working without pay in a family enterprise ................................→ continue with 1027

**Questions to those whose partner is an employee**

1027. Does your partner/spouse supervise or co-ordinate the work of any personnel?
1. yes 2. no

1028. Is the business or organisation where your partner/spouse works private, public or mixed?
1. private (including non-profitmaking organizations)
2. public
3. mixed

1029. Is your partner/spouse entitled to any of the following services or benefits that are either free or subsidised and are paid for by the business or organisation that he/she works for?

<table>
<thead>
<tr>
<th>Service</th>

11. HOUSEHOLD POSSESSIONS, INCOME AND TRANSFERS

Household Possessions and Economic Deprivation

1101. In the following I would like to talk with you about the financial situation of your household – about the things your household possesses and can afford as well as the income and transfers your household receives.

*Show Card 1101.*

Please look at this list. For each item, please indicate whether or not your household possesses it. It does not matter whether the item is owned, rented, or otherwise provided for your use. If you do not have an item, please indicate whether you … would like to have it but cannot afford it, or do not have it for other reasons, e.g. you don’t want or need it.

<table>
<thead>
<tr>
<th>Item</th>
<th>yes</th>
<th>would like but cannot afford</th>
<th>do not have for other reasons</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. colour TV</td>
<td>1</td>
<td>2</td>
<td>3</td>
</tr>
<tr>
<td>b. video recorder or DVD player</td>
<td>1</td>
<td>2</td>
<td>3</td>
</tr>
<tr>
<td>c. washing machine</td>
<td>1</td>
<td>2</td>
<td>3</td>
</tr>
<tr>
<td>d. microwave</td>
<td>1</td>
<td>2</td>
<td>3</td>
</tr>
<tr>
<td>e. home computer</td>
<td>1</td>
<td>2</td>
<td>3</td>
</tr>
<tr>
<td>f. dishwasher</td>

<td>3</td>
</tr>
<tr>
<td>j. a second home (e.g. for vacation)</td>
<td>1</td>
<td>2</td>
<td>3</td>
</tr>
</tbody>
</table>

1102. A household may have different sources of income and more than one household member may contribute to it. Thinking of your household’s total monthly income, is your household able to make ends meet …

1. with great difficulty
2. with difficulty
3. with some difficulty
4. fairly easily
5. easily
6. very easily

*If 1102=1,2,3*

1103. There are some things many people cannot afford even if they would like them. Can I just check whether your household can afford these, supposing you wanted them?

<table>
<thead>
<tr>
<th>Item</th>
<th>yes</th>
<th>no</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. keeping your home adequately warm</td>
<td>1</td>
<td>2</td>
</tr>
<tr>
<td>b. paying for a week’s annual holiday away from home</td>
<td>1</td>
<td>2</td>
</tr>
<tr>
<td>c. replacing any worn-out furniture</td>
<td>1</td>
<td>2</td>
</tr>
<tr>
<td>d. buying new, rather than second-hand clothes</td>
<td>1</td>
<td>2</td>

<tr>
<td>e. eating meat, chicken or fish every second day</td>
<td>1</td>
<td>2</td>
</tr>
<tr>
<td>f. having friends or family for a drink or meal at least once a month</td>
<td>1</td>
<td>2</td>
</tr>
</tbody>
</table>

1104. Has your household been in arrears at any time during the past 12 months, that is, unable to pay as scheduled any of the following?

<table>
<thead>
<tr>
<th>Item</th>
<th>yes</th>
<th>no</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. rent for accommodation</td>
<td>1</td>
<td>2</td>
</tr>
<tr>
<td>b. mortgage payments</td>
<td>1</td>
<td>2</td>
</tr>
<tr>
<td>c. utility bills, such as for electricity, water, gas</td>
<td>1</td>
<td>2</td>
</tr>
<tr>
<td>d. purchase instalments or other loan repayments</td>
<td>1</td>
<td>2</td>
</tr>
</tbody>
</table>
1105. Considering your household’s income as well as expenses: Is there normally some money left that you could save?

1. yes  
2. no

Income from Other Sources than Employment

1106. This list shows different types of income.

Show Card 1106: Sources of Income for the Household.

Please tell me which of these types of income has your household received during the last 12 months.

<table>
<thead>
<tr>

</tbody>
</table>
**Total Household Income**

1108. If you add up the income from all sources received during the last 12 months, what is your household’s total net income from all members including yourself? Please state the net income, which means after deductions for taxes and social security.

*Write in.*

*If R gave the answer per month, probe:*
Does this sum describe the average income of your household over the last 12 months? [If not]
Please tell me the average value over the last 12 months.

_____________________ per M Y → go to 1110
97– do not know, cannot say ...................... → continue with 1109
98– refused ........................................→ go to 1110

1109. Please look at this card and give me the approximate range of the net monthly income of your household. (Including all types of incomes -wages, alimony, retirement pension, social assistance payments, allowances, and other pensions- for all household members).

*Show Card 960: Income Range.*

1. 499 € or less
2. 500 to 999 €
3. 1,000 to 1,499 €
4. 1,500 to 1,999 €
5. 2,000 to 2,499 €
6. 2,500 to 2,999 €
7. 3,000 to 4,999 € *(separated in 2 categories: 3000 to 3999€ and 4000 to 4999€)*
8. 5,000 € or more
97– do not know, cannot say
98– refused

**Regarding income, according to you, does the fact to have had children give the right to some advantages at the time of retiring, for men?**
(For example, by rising the pension amount, giving the possibility to retire earlier or providing additional years of contribution)

1. No
2. Yes, from the first child
3. Yes, but only from the second child
4. Yes, but only from the third child

**And for women?** *(according to you, does the fact to have had children give the right to some advantages at the time of retiring)*
(For example, by rising the pension amount, giving the possibility to retire earlier or providing additional years of contribution)

1. No
2. Yes, from the first child
3. Yes, but only from the second child
4. Yes, but only from the third child*
**Monetary Transfers**

1110. During the last 12 months, have you or your partner/spouse received for one time, occasionally, or regularly money, assets, or goods of substantive value from a person outside the household? Please think also about land and property or inheritance that was transferred to you or your partner/spouse during this time.

1. yes ↓
2. no → go to 1114

<table>

1115. To whom have you given that?

*Record up to 5 persons in this row. Code using the List of Providers and Receivers.*

*Ask 1116-1117 about each mentioned person.*

1116. Was it a one-time, occasional or a regular transfer?

1 – one-time
2 – occasional
3 – regular

1117. What was the total cash value of the money, assets, or goods that you or your partner/spouse gave to this person within the last 12 months?

Go to 1115 to the next person. If no more person continue ↓
12. VALUE ORIENTATIONS AND ATTITUDES

(We are arriving now at the end of our interview, to end up..) Now, I would like to ask your views and attitudes towards several domains of life.

I am going to read out some statements about religious ceremonies and I would like you to tell me to what extent do you agree or disagree with each one.

- It is important for an infant to be registered in the appropriate religious ceremony
- It is important for people who marry in registry offices to have a religious wedding too
- It is important for a funeral to include a religious ceremony

1. strongly agree
2. agree
3. neither agree nor disagree
4. disagree
2. strongly disagree

1201. People sometimes talk about what the aims of this country should be for the next 10 years. On this card are listed some of the goals which different people would give top priority. Would you please say which one of these you, yourself, consider the most important?

Show Card 1201 and code one answer only under first choice.

And which would be the next most important?

Code one answer only under second choice.

Card 1201

1212. a. That's all the questions I have. Thank you very much for your time and patience. You have been a great help. One of the things we are most interested in is how things might change over time, and so we will come back to interview you again. In case you happen to move, is there someone else we could contact who would help us find you?

Name of contact: __________________________

Relationship to respondent: ________________

Telephone number: ______________

*Interviewer, tick mark here ___ ONLY if respondent says that he/she does no want to be re-contacted.*
13. INTERVIEWER OBSERVATIONS

Interviewer Instruction: Fill in the following answers without asking.

1301. Interview ended at __________________ on _____________________________

1302. Type of dwelling
  1. a detached house
  2. a semi-detached house
  3. an attached row house
  4. an apartment/room in a building of less than 4 floors and no elevator
  5. an apartment/room in a building of less than 4 floors and with elevator
  6. an apartment/room in a building with 4 floors or more and no elevator
  7. an apartment/room in a building with 4 floors or more and with elevator
  8. a dwelling unit that specifically meets the needs of the elderly (service-flat, semi-independent, sheltered accommodation)
  9. a farm
  10. an institution (home for the elderly, nursing home)
  11. other, specify...

1303. Floor on which R lives

________________

Interviewer Instruction: Fill in the Interviewer Report immediately after the interview.
14. INTERVIEWER REPORT

1401. Interruptions of the interview:
1. ______ at/after question No. ______ for ______ minutes
2. ______ at/after question No. ______ for ______ minutes
3. ______ at/after question No. ______ for ______ minutes
4. ______ at/after question No. ______ for ______ minutes
5. ______ at/after question No. ______ for ______ minutes

1402. a. Were any other people present during any part of this interview?
1. yes ↓ 2. no → go to 1403

Comment: this question was asked several times in the beginning of some sections of the questionnaire.

b. Did any of these people seem to influence any of the answers given by the respondent?
1. — a great deal
2. — a fair amount
3. — a little
4. — not at all

c. In what way was the respondent influenced?
Specify at which questions (or entire parts of the questionnaire) and describe the way of influence:
1. — the person answered the question instead of R
2. — R was reluctant to answer
3. — children were asking for the attention of R
4. — other, specify....

1403. All in all, how willing was the respondent to answer the questions?

not willing at all ______ 1 2 3 4 5 6 7 8 9 10 very willing

1404. How would you judge the information the respondent gave?

not reliable at all ______ 1 2 3 4 5 6 7 8 9 10 very reliable

1405. Would you say that the respondent answering to you was also interviewed in the previous wave 3 years ago?
1. ______ I’m convinced she/he was
2. ______ It is very likely she/he was
3. ______ I am not certain
4. ______ It is very likely she/he was not
5. ______ I am convinced she/he was not
